Excerpt from A Laboratory Manual of Physics For Use in High Schools Our special objects in the preparation of this volume may be very simply stated They are as follows 1 We have aimed not to describe classical experiments but to illustrate the first principles of physics The simplicity with which this can be done is to us a matter of constant surprise and delight 2 Our purpose has been to supplement some of the excellent text books already in use most of which however were prepared with especial reference to the class room rather than to the laboratory It will be observed that almost without exception the principles which we have sought to illustrate are discussed in each of the seven volumes to which we make reference 3 One of our main objects has been to reduce to a minimum the expenditure of teaching energy With this in mind we have placed a list of apparatus at the beginning of each exercise enabling the instructor to prepare quickly and confidently the entire outfit necessary for the experiment To this end also we have made a special effort to state the problem not by merely giving the name of some instrument but by stating the controlling principle and the point of view from which the entire experiment should be worked out Economy of teaching energy has also led us to suggest only apparatus which is simple inexpensive easily obtained and easily duplicated At the same time we have borne in mind the fact that apparatus is not necessarily simple because it is home made Indeed apparatus can be considered cheap only when it combines economy of first cost with economy of thought on the part of the student and economy of energy on the part of the instructor About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
