4 pages | 856 words

Unnecessary animal testing is still being performed due to research showing that this process does create desired results. For many many years animals have been used at scientific 'experiments' cosmetically and scientifically. I will be informing in this essay how animals are used to test drugs and consumer products specifically cosmetically. Pharmaceutical companies and research institutions have been active in animal experiments because these institutions are charged with coming up with new drugs. What has been controversial about this topic is whether or not this should be banned based on certain implications.

Animal rights activists have been advocating for a ban for several years. Even though it was extremely sad what we do to these animals such as stripping their fur and test skin sensitivity and burning their eyes to test eye sensitivity, this procedure is beneficial. So therefore in my opinion I do not think animal testing should be banned. Animal experiments and testing should not be banned because it has been beneficial to humans and as crazy as it sounds even to other animals. If one were to think about this if it were for animal testing we wouldn't have figured out some huge cures for things such as polio vaccines and different cancers.

An example is Blakemore, executive of the British Medical Research Council. In one of his speeches he mentions how people are so hung upon the 'cruelty' part of animal testing that they can't focus on how incredible this process really is. Drugs such as Avastin used to treat bowel, breast, and lung cancer were only possible due to the experimental process on mice. Critics have however been indicating a number of ethical implications linked with animal testing. As the critics point out, animal testing is a procedure that does not take into consideration the rights of animals. Which I can understand why this would be a concern, however I still fail to agree.

One thing I will agree on with the critics is how animals deserve to be treated fairly. Now this doesn't necessarily mean no testing but instead safe testing. A while back there was a testing done on animals to see if it really does truly mistreat them. Some people against animal testing and wish it was banned for good had some negative feedback saying the test is unethical. This experiment fundamentally was meant to test the level of toxicity of substances. These critical arguments have formed the argumentative side of banning animal testing. It may be justified to complain in terms of animal cruelty and such if there was legitimate evidence that these animals are truly being mistreated.

Considering that few cases have been reported regarding inhumane treatment of animals, this should not be ethical to ban animal testing. There is a considerably higher percentage of it being a beneficial process than not. Also, scientific testing on animals has made a huge impact on human lives. To look at the big picture what is more important an animal getting a slight burn in their eyes for a split second or millions of human beings dying from diseases that could be cured is...

What is Posthumanism? Cary Wolfe, 2010 What does it mean to think beyond humanism Is it possible to craft a mode of philosophy ethics and interpretation that rejects the classic humanist divisions of self and other mind and body society and nature human and animal organic and technological Can a new kind of humanities posthumanities respond to the redefinition of humanity s place in the world by both the technological and the biological or green continuum in which the human is but one life form among many Exploring how both critical thought along with cultural practice have reacted to this radical repositioning Cary Wolfe one of the founding figures in the field of animal studies and posthumanist theory ranges across bioethics cognitive science animal ethics gender and disability to develop a theoretical and philosophical approach responsive to our changing understanding of ourselves and our world Then in performing posthumanist readings of such diverse works as Temple Grandin s writings Wallace Stevens s poetry Lars von Trier s *Dancer in the Dark* the architecture of Diller Scofidio and David Byrne and Brian Eno s *My Life in the Bush of Ghosts* he shows how this philosophical sensibility can transform art and culture For Wolfe a vibrant rigorous posthumanism is vital for addressing

questions of ethics and justice language and trans species communication social systems and their inclusions and exclusions and the intellectual aspirations of interdisciplinarity In *What Is Posthumanism* he carefully distinguishes posthumanism from transhumanism the biotechnological enhancement of human beings and narrow definitions of the posthuman as the hoped for transcendence of materiality In doing so Wolfe reveals that it is humanism not the human in all its embodied and prosthetic complexity that is left behind in posthumanist thought
