Community Participation with Schools in Developing Countries Mikiko Nishimura,2020-08-04 The Sustainable Development Goals SDGs 2016 2030 set by the United Nations in 2015 restated the importance of universal primary education for all and specifically discuss quality equity and inclusion in basic education To achieve this the role of community has been emphasized and participation has become a buzzword in international development over the past several decades Despite the growing attention to community participation in school management previous literature has shown mixed results in terms of its actual practice and its impacts on quality equity and inclusion in education This book deepens the contextual understanding of community in developing countries and its involvement in schools in general and its impact on quality equity and inclusion of school education in particular By presenting various case studies in Asia Africa Latin America and a post conflict state in Europe the book analyses commonalities and differences in the ways communities are involved and cast their impacts and challenges The book contributes knowledge on the ways in which community involvement could work in developing countries the detailed processes and factors that make community participation work in different dimensions and remaining challenges that scholars and practitioners still need to be concerned and mindful in the field This book will appeal to both researchers and practitioners who are concerned about the community participation approach for the SDGs

Castillo,SuzanneGrant Lewis,2022-02-21 Improving learning evidence and outcomes for those most in need in developing countries is at the heart of the United Nations Sustainable Development Goal on Education SDG4 This timely volume brings together contributions on current empirical research and analysis of emerging trends that focus on

The Kenya Education Directory, 2005 **Kenya National Assembly Official Record (Hansard)**, 1990-03-14 The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya **Transforming Education and Development Policies for Pastoralist Communities in Kenya** Ibrahim Oanda Ogachi, 2011 This study is a contribution towards exploring alternative but sustainable education policies for pastoralist societies and sets out to explore how pastoralist IKSs Indigenous Knowledge Systems can be integrated or used as an entry point to provide formal schooling to pastoralist communities in Kenya Pastoralists constitute the majority of the socially and economically vulnerable groups in the country Children among pastoralist communities face detrimental hardships that compromise their growth and development One of these hardships is the imposition of an education and development paradigm that is irrelevant to their existence and which compounds their problems This study therefore sought to explore how through better government policies the indigenous knowledge IK of pastoralists could be integrated into the curriculum of formal schooling Specifically the study discusses the following issues Gaps in policies for schooling provision for pastoralist groups with particular reference to the content of the curriculum and methods of delivery Aspects of pastoralist IKS that can be integrated into the context of national education policy to enrich their schooling within and General recommendations regarding the use of participatory and social engineering approaches in designing education and development policies affecting pastoralist communities in Kenya

Incentives to Learn Michael Kremer, Edward Miguel, Rebecca Thornton, 2005 We report results from a randomized evaluation of a merit scholarship program for adolescent girls in Kenya Girls who scored well on academic exams had their school fees paid and received a cash grant for school supplies Girls eligible for the scholarship showed significant gains in

academic exam scores average gain 0.12 (0.19 standard deviations) and these gains persisted following the competition. There is also evidence of positive program externalities on learning: boys who were ineligible for the awards also showed sizeable average test gains as did girls with low pretest scores who were unlikely to win. Both student and teacher school attendance increased in the program schools. We discuss implications both for understanding the nature of educational production functions and for the policy debate surrounding merit scholarships. National Bureau of Economic Research web site
