

Manual Handling Risk Assessment

				certain points, at times the trolley is unable to continue without the obstacles being moved	especially important when considering the risk of blocking pedestrian walkways	
Surfaces or edges cause cuts / abrasions / burns to hands or body		X		Employees wear gloves, also the frame is smooth with no burrs. The corners of the frame may cause an injury through an impact, particularly with the front operator.	Handles and maintenance will reduce this risk.	H&S Client, Client Staff, Safeti
Rutted, Damaged, Slippery Floors		X		Surface is free from damage and slip hazards and the company have a cleaning team to deal with any spills.	Ensure any spillages are cleaned and dried immediately.	H&S Client, Client Staff, Safeti
Ramps, Slopes, uneven surfaces		X		Directly outside the factory there is a slight incline, however this is not of significance as the unloading bay is flat. Also, the trolley negotiates this with no trouble or excessive strain on the employees.		H&S Client, Client Staff, Safeti
Trapping / Tripping Hazards		X		The coasters are raised and lowered with a handle situated on the leg posts, legs are only lowered when in transit or in their final position, employees ensure their feet are away from the trolley prior to lowering the wheels.		H&S Client, Client Staff, Safeti
Lighting Conditions		X		Lighting is provided throughout the factory and the lighting is sufficient for the task.		H&S Client, Client Staff, Safeti
Hot, Cold, Humid conditions		X		The temperature and conditions within the factory are good, the distance between the unloading bay and the factory is approximately 5 m and does not pose a risk due to the buildings providing some protection.		H&S Client, Client Staff, Safeti
Strong air movements		X		The distance between the unloading bay and the factory is approximately 5 m from the building which will provide some protection. However, the opposite side of the building is open and may pose a risk from strong winds. This risk will be increased when large parts are on the trolley, thus causing a 'kite' effect which can lead to the trolley moving and causing injuries to employees and/or damage to property and/or the parts that are on the trolley. The absence of brakes makes the trolley more susceptible to movement, even in lighter wind conditions.	Client must ensure the parts placed on the trolley are sufficiently strapped to prevent damage caused by high winds. Brakes on the trolley will reduce the risk of it being blown easily. The trolley may be loaded within the factory during strong gusts OR the trolley movement can be delayed due to inclement weather	H&S Client, Client Staff, Safeti
Individual Capability						
Unusual Capability Requirements			X	No special capabilities are required.		H&S Client, Client Staff, Safeti
