Mesoamerican Archaeology Lisa Overholtzer, 2021-03 In the seventeen years since the first edition of Mesoamerican Archaeology Method and Theory was published our goal of providing

theoretically sophisticated and data rich explorations of important topics for a non specialist reader written by the researchers themselves has proved successful When approached by Wiley Blackwell to edit a second edition the original coeditors Julia Hendon and Rosemary Joyce agreed that the chance to incorporate new research by an international array of scholars was not to be missed The first move was to add Lisa Overholtzer as editor The three of us approached some authors from the first edition who agreed to update or rewrite their chapters We then invited new contributors whose work reflects current research trends in Mesoamerican archaeology For this edition we purposefully included a chapter on bioarchaeology and three chapters that include the Colonial period in their discussions As with the first edition this book is intended to be useful for anyone teaching Mesoamerican archaeology whether as the sole subject of a course or as one case study among others in courses dealing with archaeology of the Americas complex societies or other topics We also expect that it will be of interest to any reader who wants a sample of contemporary research on the major time periods and societies that are the focus of Mesoamerican archaeology Because this book is a departure from other models for introductory texts it is appropriate for us to briefly explain what it is and is not and to suggest how we hope it might be incorporated into the classroom All three of us teach material from the field of Mesoamerican archaeology in basic introductory courses and more advanced offerings As active researchers who each have developed and led our own field projects we find ourselves struggling to provide students with a sense of the research process In particular we think it is important for students to see that changes in archaeological understanding or differences in opinion as illustrated by some of the essays included here are a constructive part of the research process They reflect the mechanisms through which our discipline debates explanations puts them to the test against existing and new data and gradually revises them Too often we find that students and people outside the academy interested in archaeology have the impression especially from media coverage that changes in interpretation result from violent rejection of earlier ideas represented as poorly conceived foolish or examples of bad work We do not think that representing archaeology as a kind of winner takes all contest is very true to the reality of the constant hard work only occasionally accompanied by moments of transformative insight that we experience as field researchers Nor does the metaphor of a contest accurately represent the way that new research builds on and acknowledges older ideas even in the process of modifying extending or disagreeing with those ideas

Mesoamerican archaeology reveal the creation perpetuation and contestation of politically authoritative relationships between rulers and subjects and between nobles and commoners The contributions span the geographic breadth and temporal extent of pre Columbian Mesoamerica from Preclassic Oaxaca to the Classic Pet n region of Guatemala to the Postclassic Michoac n and the contributors weave together archaeological epigraphic and ethnohistoric data Grappling with the questions of how those exercising authority convince others to follow and why individuals often choose to recognize and comply with authority Political Strategies in Pre Columbian Mesoamerica discusses why the study of political authority is both timely and significant reviews how scholars have historically understood the operation of political authority and proposes a new analytical framework to understand how rulers rule Contributors include Sarah B Barber Joanne Baron Christopher S Beekman Jeffrey Brzezinski Bryce Davenport Charles Golden Takeshi Inomata Arthur A Joyce Sarah Kurnick Carlo J Lucido Simon Martin Tatsuya Murakami Helen Perlstein Pollard and V ctor Salazar Ch vez Houses in a Landscape Julia A. Joyce,2022-07-15 Materializing Ritual Practices explores the deep history of ritual practice in Mexico and Central America and the ways interdisciplinary research can be coordinated to illuminate how rituals create destroy and transform social relations Ritual action produces sequences of creation destruction and transformation which involve a variety of materials that are active and agential The materialities of ritual may persist at temporal scales long beyond the lives of humans or be as ephemeral as spoken words music and scents In this book archaeologists and ethnographers including specialists in narrative music and ritual practice explore the rhythms and materiality of rituals that accompany everyday actions like the construction of houses healing practices and religious festivals and that paced commemoration of rulers ancestor veneration and relations with spiritual beings in the past Connecting the kinds of observed material discursive practices that ethnographers witness to the sedimented practices from which
