**World of Warcraft Programming** James Whitehead, II, Bryan McLemore, Matthew Orlando, 2008-05-05 WoW is what you'll say when you see how many ways you can tweak the World of Warcraft interface after you read this book. If you're new to programming we'll teach you the basics of Lua and XML and walk you through writing your first add-on. If you already have some original add-ons in your arsenal jump right into Parts III and IV and work with templates, function hooking, custom graphics, state headers and more. We'll even help you distribute your add-ons making WoW better for everybody. Respond to events, create frames and use the WoW API to interact with the game. Learn the Lua programming language through interactive examples from values and variables to custom functions and control structures. Write well-formed XML and validate using schemas. Find specific functions easily in the comprehensive references of APIs, API categories, events and widgets. Create custom graphics, scroll frames, dropdown menus and much more. A Note from the Publisher: In the first printing we mistakenly omitted the Authors Acknowledgements which included the names of many World of Warcraft community members who helped bring this book to market. I want to publicly thank them for their efforts and apologize for the omission which will be corrected in the second printing. It is the members of the WoW community that make Blizzard's amazing game an even greater experience for millions of players around the world and their efforts on this book are greatly appreciated. Chris Webb, Executive Editor: From the Authors: James and Lee Whitehead thank you for standing behind me on everything that I've done throughout my wacky life. None of this would have been possible without the guidance and support that you've provided me. Michelle Hastings thank you for finding a way to bridge a 5300 mile gap and still make me feel like I'm in your living room. Robert and Gregory Whitehead thank you for sticking by me wherever I am and whatever I do without ever passing judgment. Tom Harper thank you for letting me be a part of your life. Every single day with you is an adventure. I can't wait to begin and you have changed my life forever. Jamie Anderson and Edward Wilman thank you for letting us invade your sanctuary and for being such good friends. Charlie Radcliffe, Björn Alfthan, Anne Christianson and Chris McCabe thank you for being great flatmates. Worcester College, MCR thank you for giving me a community of friends in a very foreign land. Karen Hobson thank you for being so helpful and supportive throughout the last two projects you've helped keep me afloat. Sam Lantinga thank you for all the time and effort you put into helping the World of Warcraft community. Kevin M Kelly thank you for your odd sleep patterns and availability. Exploration of the unknown is always easier when you have a friend with a map. Daniel Stephens thank you for your help digging through various parts of the API and for giving me a good jumping off point for my data exploration. Chris Webb thank you for bringing this book and Hacking World of Warcraft into existence. Both books serve as great resources for the WoW UI community. Maryann Steinhart thank you for your guidance through the entire process. Your feedback as always has proved instrumental to the process.
