Geoff Connellan

Management Principles And Practice Griffin 1st Chapter:

Water Use Efficiency for Irrigated Turf and Landscape Geoff Connellan, 2013-02-20 Achieving high water use efficiency in maintaining turf trees and landscape areas is a core responsibility of open space managers. *Water Use Efficiency for Irrigated Turf and Landscape* provides a logical and scientifically sound approach to irrigation in urban areas in Australia. It is based on green space delivering defined outcomes using the principles of water sensitive urban design and irrigation efficiency. The book covers all stages of the water pathway from the source to delivery into the plant root zone. Major topics include system planning, estimating water demand, water quality, irrigation systems, soil management, and irrigation performance evaluation. Clearly presented explanations are included as well as line drawings and worked examples and a plant water use database covering more than 250 plant species. A Water Management Planning template is included to guide water managers and operators through a process that will deliver a sound plan to achieve sustainable turf, urban trees, and landscapes. Best Management Practice Irrigation principles are outlined, and their implementation in open space turf and landscape situations is explained. The benefits and limitations of the various methods of delivering water to plants are covered together with case studies and guidelines for specific horticultural situations. Methodologies to evaluate irrigated sites are included along with recommended benchmark values. The book presents the latest irrigation technology, including developments in water application control technology and environmental sensors such as weather stations, soil moisture sensors, and rain sensors.

The Green Library Planner Mary M. Carr, 2013-09-11 Green buildings are better buildings. In fact, buildings use 36% of the energy in the United States according to the Environmental Protection Agency, so green buildings that use less energy help to address the very real challenges of reliance on fossil fuel and climate change. More than only being environmentally responsible, green libraries are beautiful, cost-effective, high performance.

buildings that enhance occupant health and comfort The Green Library Planner is designed for members of library building design teams who typically are not actively engaged in architecture construction or engineering but who need an introduction to the rationale for green buildings the elements of green building and the language of the field It will be equally useful for public officials boards or administrators who are considering a new green library building a renovated library structure or sustainable elements for a current library facility Mary M Carr a library director who is also a LEED Accredited Professional with national certification first introduces the basic tenets of green building She then covers the gamut of green building from design through all phases of construction or renovation to operations and maintenance Chapter highlights include Fundamentals of Sustainable Building The Importance of Place Energy and Lighting Indoor Environmental Quality Water Conservation and Quality Sustainable Construction Management Techniques Commissioning Sustainable Operations and Maintenance With this information the librarian and related library staff and administrators will be able to design build or renovate and operate the library in the best way possible while considering the environmental and economic challenges faced locally and globally in the 21st century The International Handbook on Innovation Larisa V Shavinina, 2003-10-16 Approx 1200 pages Approx 1200 pages **American Tree Farmer & Forestry Digest**, 1960
