Mathematics Paper 1 03 June 2013 Memorandum:

Cognitive Communication and Cooperative HetNet Coexistence Maria-Gabriella Di Benedetto, Faouzi Bader, 2014-01-16

This book written by experts from universities and major industrial research laboratories is devoted to the very hot topic of cognitive radio and networking for cooperative coexistence of heterogeneous wireless networks. Selected highly relevant advanced research is presented on spectrum sensing and progress toward the realization of accurate radio environment mapping, biomimetic learning for self-organizing networks, security threats with a special focus on primary user emulation attack and cognition as a tool for green next generation networks. The research activities covered include work undertaken within the framework of the European COST Action IC0902 which is geared towards the definition of a European platform for cognitive radio and networks. Communications engineers, R D engineers, researchers and students will all benefit from this complete reference on recent advances in wireless communications and the design and implementation of cognitive radio systems and networks.

Access to Scientific Research David J. Brown, 2015-11-13 The debate about access to scientific research raises questions about the current effectiveness of scholarly communication processes. This book explores from an independent point of view the current state of the STM publishing market, new publishing technologies and business models as well as the information habit of researchers, the politics of research funders and the demand for scientific research as a public good. The book also investigates the democratisation of science including how the information needs of knowledge workers outside academia can be embraced in future.

Global Flood Hazard Guy J-P. Schumann, Paul D. Bates, Heiko Apel, Giuseppe T. Aronica, 2018-06-05 Global Flood Hazard Subject Category Winner PROSE Awards 2019 Earth Science. Selected from more than 500 entries demonstrating exceptional scholarship and making a significant contribution to the field of study. Flooding is a costly natural disaster in terms of damage to land, property and infrastructure. This volume describes the latest tools and technologies for modeling, mapping and predicting large scale flood risk. It also presents readers with a range of remote sensing data sets successfully used for predicting and mapping floods at different scales. These resources can enable policymakers, public planners and developers to plan for and respond to flooding with greater accuracy and effectiveness. Describes the latest large scale modeling approaches including hydrological models, 2 D flood inundation models and global flood forecasting models. Showcases new tools and technologies such as Aqueduct, a new web based tool used for global assessment and projection of future flood risk under climate change scenarios. Features case studies describing best practice uses of modeling techniques, tools and technologies. Global Flood Hazard is an indispensable resource for researchers, consultants, practitioners and policy makers dealing with flood risk, flood disaster response, flood management and flood mitigation.
