*Molecular Structure by Diffraction Methods* L E Sutton, M R Truter, 2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields, the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years, the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967, the whole spectrum of chemistry could no longer be contained within one volume, and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three volumes covering Inorganic, Organic, and Physical Chemistry. For more general coverage of the highlights in chemistry, they remain a must. Since that time, the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name, whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume. *Molecular Structure by Diffraction Methods*, 1978

*Computer Based Projects for a Chemistry Curriculum* Thomas J. Manning, Aurora P. Gramatges, 2013-04-04 This e-book is a collection of exercises designed for students studying chemistry courses at a high school or undergraduate level. The e-book contains 24 chapters, each containing various activities employing applications such as MS Excel spreadsheets and Spartan computational modeling. Each project is explained in a simple, easy-to-understand manner. The content within this book is suitable as a guide for both teachers and students, and each chapter is supplemented with practice guidelines and exercises. *Computer Based Projects for a Chemistry Curriculum* therefore serves to bring computer-based learning, a much-needed addition in line with modern educational trends, to the chemistry classroom. *Energy Research Abstracts*, 1994
