**Selected Topics in Medical Artificial Intelligence** Perry L. Miller, 2012-12-06 Computer technology has impacted the practice of medicine in dramatic ways Imaging techniques provide noninvasive tools which alter the diagnostic process Sophisticated monitoring equipment presents new levels of detail for both patient management and research In most of these technology applications the computer is embedded in the device its presence is transparent to the user There is also a growing number of applications in which the health care provider directly interacts with a computer In many cases these applications are limited to administrative functions e g office practice management location of hospital patients appointments and scheduling Nevertheless there also are instances of patient care functions such as results reporting decision support surveillance and reminders This series Computers and Medicine will focus upon the direct use of information systems as it relates to the medical community After twenty five years of experimentation and experience there are many tested applications which can be implemented economically using the current generation of computers Moreover the falling cost of computers suggests that there will be even more extensive use in the near future Yet there is a gap between current practice and the state of the art Long Island Medical Journal Henry Goodwin Webster, Paul Monroe Pilcher, Frank Overton, Alec Nicol Thomson, 1924
