Medicare Charting Guidelines Healthinsight:

The Joint Commission Journal on Quality Improvement ,1996-06 **Limited Compliance with Medicare's Home Health Face to Face Documentation Requirements.** CreateSpace Independent Publishing Platform,Office of the Investigator General,2018-07-03 Limited compliance with Medicare s home health face to face documentation requirements

Clinical Process and Outcomes Measurement Directory American Medical Association,1998-10 The American Medical Association s Clinical Process and Outcomes Measurement Directory is an outgrowth of the AMA s Outcomes Research Resource Guide Tiffs book provides detailed information on approximately 250 clinical process and outcomes activities based on an extensive survey of national medical specialty societies state and county medical societies large physician group practices peer review and private organizations

Medicare Risk Adjustment and HCC Clinical Documentation Overview The Coders Choice LLC,2019-03-09 Risk adjustment is a method to offset the cost of providing health insurance for individuals such as those with chronic health conditions who represent a relatively high risk to insurers Under risk adjustment an insurer who enrolls a greater than average number of high risk individuals receives compensation to make up for extra costs associated with those enrollees In the absence of risk adjustment policies insurers have a financial incentive to deny coverage to higher risk individuals and to write exclusions into policies or impose unaffordable premiums for individuals with pre existing medical conditions Risk adjustment aims to make comprehensive insurance available to all individuals regardless of risk and to allow plans that insure sicker than average populations to charge similar average premiums as plans that insure relatively healthy populations The risk adjustment model enacted under the Affordable Care Act ACA or Obamacare is budget neutral Total payments to insurers do not increase Rather insurers covering a relatively greater number of healthy individuals must contribute to a risk adjustment pool that funds additional payments to those insurers covering a larger portion of high risk individuals Risk adjustment models typically use an individual s demographic data age sex etc and diagnoses to determine a risk score The risk score is a relative measure of the probable costs to insure the individual To cite a simple example an individual with diabetes will have a higher risk score his or her predicted healthcare costs will be greater than an otherwise statistically identical individual without diabetes Older individuals typically have a higher risk score than younger individuals and those individuals with a personal or family history of certain conditions may garner a higher risk score than individuals without such a history There are several risk adjustment models The Centers for Medicare however some risk adjustment models may include severe conditions relevant to a young demographics such as pregnancy and congenital abnormalities All risk adjustment models depend on complete and accurate reporting of patient data CMS requires that a qualified healthcare provider identify all chronic conditions and severe diagnoses for each patient to substantiate a base year health profile for those individuals Documentation in the medical record must support the presence of the condition and indicate the provider s assessment and plan for management of the condition This must occur

at least once each calendar year for CMS to recognize that the individual continues to have the condition This information is used to predict costs in the following year As such incorrect or non specific diagnoses can affect not only patient care and outcomes but also reimbursement for that care going forward

The Beacon Guide to Medicare Documentation Diane J. Omdahl,1988

The Beacon Guide to Medicare Service Delivery Beacon Health,2014-06-29 Updated to reflect the 2013 PPS Final Rule The Beacon Guide to Medicare Service Delivery 2013 Edition helps your staff understand how to deliver and document patient care in compliance with the Medicare rules Newly expanded to include care planning and navigating the CMS 485 the Beacon Guide remains the industry leader in providing complete interpretation and compliance guidelines on all PPS regulations What s New in the 2013 Edition The Beacon Guide has been reviewed for accuracy and updated to reflect changes based on the 2013 PPS Final Rule Analysis of how to comply with the updated face to face physician encounter requirement including strategies to complete required documentation Guidance on new therapy coverage and reassessment changes including tips on how to meet assessment timelines and ensure documentation accuracy Survey preparation strategies under the revised survey process Benefit from this manual by Giving staff a working knowledge of the current regulations Implementing checks to ensure services are delivered according to regulations Producing documentation that supports compliance and payment claims
