

Medical School Personal Statement

Admissions officers will often emphasize that they don't care what you choose to write about in your essay. They stress this because most writers err on the side of unoriginality, having tried too hard to meet the expectations of their imagined readers, discarding all of their own personality in the process.

Of course, there's truth in their advice: you should write with the goal of expressing your own values and conveying the qualities most important to you. You should frame this discussion in a way that highlights your unique character. But you must exercise your creativity with an eye toward the themes and points that will justify your suitability for medicine. After all, your ultimate goal is not just to stand out as a likeable person, but to obtain admission to a medical school.

In addition to the challenge of crafting a fresh take on standard ideas, you face the difficulty of integrating multiple sophisticated themes into a single coherent piece. The themes can be grouped into two basic categories: those that speak to your motivation for becoming a doctor and those that demonstrate the characteristics and abilities that qualify you for the profession.

Within these two categories we will make recommendations for more specific points and the various ways you can approach them. First, however, we will explore what medical school admissions officers look for in personal statements. In addition, we will devote a section to the task of making your essay stand out by emphasizing the qualities that make you unique, even if they don't seem obviously related to medicine. Finally, we will offer tips on how to deal with blemishes on your application, like low MCAT scores or a lack of work experience.

What Do "They" Look For?

Quotes by members of our panel of admissions officers are in italics.

The great challenge of the medical school application essay is how to discuss common themes in a fresh way. Later sections of this guide will provide you with tips on how to make your essay stand out, but for now we will outline the key qualities and abilities that the excellent essays demonstrate.

As we will stress throughout, the essay is meant to convey the personal characteristics that the rest of your application cannot communicate. So we will preface our list with a warning about what not to include: anything that is fully covered by another part of the application. For example, do not tell the reader your GPA or name the awards that you won in college. Avoid simply listing your extracurricular activities. If you bring any of these issues up, you should have some significant insight to add that is not evident from another part of your application.

Sincerity

Believe it or not, admissions officers rank sincerity highest in importance, above any quality seemingly more specific to medicine. Ultimately, they just want to know who you are, and in

The Complete MD/PhD Applicant Guide Jonathan Sussman, Jordan Setayesh, Amitej Venapally, 2020-09-22 This book is a student reference guide book for the MD/PhD application process. It begins with an overview of the structure of a typical MD/PhD program, as well as student outcomes and career choices of MD/PhD graduates. Next is an outline of the academic and extracurricular prerequisites, as well as the basic components of the application itself. The authors then address the factors that MD/PhD students should consider when selecting schools to which to apply. Continuing to the main application, examples are provided of all the different essay types that MD/PhD applicants will encounter, along with comments on how to address the deliberately vague and abstract prompts while tailoring the responses to the combined degree program. Most uniquely included is a very detailed explanation of the many types of interviews that applicants will encounter and how to prepare for them by integrating extensive personal experience and first-hand discussions with MD/PhD program leaders. Lastly, there will be a discussion on how to cope with the year-long timeline that constitutes this application process and provide guidance regarding properly responding to acceptances and waitlist offers. Written by a team of authors, each experienced with the MD/PhD application, this book aids the prospective applicant with navigating this challenging process.
