Practitioners in both East and West who advise on compliance with regulations for RPTs or represent stakeholders interests against abusive RPTs will ensure appropriate remedies and protection mechanisms for their clients     Corporate and Unitary Legal Entities in Russia Florian Heindler, 2018-04-19 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of the law of business formations in Russia provides quick and easy guidance on a variety of corporate and partnership considerations such as mergers rights and duties of interested parties stock exchange rules labour laws and takeovers Lawyers who handle transnational business will appreciate the explanation of local variations in terminology and the distinctive concepts that determine practice and procedure A general introduction covering historical background definitions sources of law and the effect of international private law is followed by a discussion of such aspects as types of formation capital shares management control liquidation mergers takeovers holding companies subsidiaries and taxation Big companies various types of smaller entities and partnerships are all covered in turn These details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance Thorough yet practical this convenient volume puts the information necessary for corporations to compete effectively at the user s fingertips An important and practical tool for business executives and their legal counsel interested in engaging in an international partnership or embarking on corporate expansion this book will prove a valuable time saving tool for business and legal professionals alike Lawyers representing parties with interests in Russia will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative business law

Asner, Stephen J. Garber, 2019 As early as April 1999 NASA Administrator Dan Goldin established the Decadal Planning Team DPT to provide a forum for future Agency leaders to begin considering goals more ambitious than sending humans on missions to near Earth destinations and robotic spacecraft to far off destinations with no relation between the two Goldin charged DPT with devising a long term strategy that would integrate

the entire range of the Agency's capabilities in science and engineering robotic and human spaceflight to reach destinations beyond low Earth orbit. When the Bush administration initiated interagency discussions in 2003 to consider a new spaceflight strategy, NASA was prepared with technical and policy options as well as a team of individuals who had spent years preparing for the moment. Although elements of the policy that President Bush announced at NASA Headquarters in January 2004, the Vision for Space Exploration (VSE) differed from the plans developed by DPT and its successor, the NASA Exploration Team (NeXT), the benefits of preparation were unmistakable. From the moment President Bush announced the VSE, NASA stood ready to implement it. Key decisions such as setting a termination date for Shuttle flights and initiating development of technologies for deep space exploration heralded a paradigm shift, allowing both NASA and the U.S. space community to move beyond the infrastructure, technologies, and institutional arrangements that had sustained low Earth orbit operations for more than two decades. This book provides a detailed historical account of the plans, debates, and decisions that opened the way for a new generation of spaceflight at the start of the 21st Century.
