**International Law** Carlo Focarelli, 2019 International Law provides a comprehensive theoretical examination of the key areas of international law In addition to classic cases and materials Carlo Focarelli addresses the latest relevant international practice to illustrate contemporary themes and trends in international law and to examine its most topical challenges

Amenazas, respuestas y régimen político Alberto Edgardo Dojas, 2016-06-03 Esta publicación contiene la tesis doctoral de Alberto E Dojas en la cual se reexamina la historia y las doctrinas del uso de la fuerza junto con el derecho internacional que lo ha regulado desde comienzos de la sociedad internacional Por un lado explica que las categorías tradicionales utilizadas para analizar justificar y establecer la legalidad del uso de la fuerza son insuficientes para comprender la complejidad de la interacción material entre las amenazas y respuestas y sus respectivas justificaciones por parte de los Estados Por otro lado el libro analiza las diversas variantes existentes entre la legítima defensa y la agresión y desarrolla los múltiples aspectos de la doctrina de la intervención preventiva

*Encyclopedia Corruption in the World* Judivan J. Vieira, 2018-04-18 The publication of this book collection by Prof Judivan J Vieira PhD is driven more by mission than editorial pursuits The research is composed of five volumes and it is the result of the authors willful work in a field of study that has been his passion since his graduation in law school in 1993 Corruption is inherent to the human being and according to the author it is a metastatic cancer within the rights of a democratic society Throughout the five volumes Judivan Vieira analyzes the various perspectives of this disease that delays and wipes out nonhegemonic countries and threatens developed countries In the last volume of the collection the author offers the solution to remediate this disease of the soul which prevents social well being and relegates us to live in formal democracies

La nécessité en droit international Sarah Cassella, 2011-05-06 La Commission du droit international après avoir longuement hésité a inscrit l'état de nécessité dans sa codification de la responsabilité des États en tant que circonstance excluant l'illicé L'objet de cette étude est de démontrer qu'il s'agit d'un mécanisme beaucoup plus diffus et fondamental du droit international intimement liés ses caractéristiques propres Il a comme fonction la limitation des obligations substantielles des États lors de la survenance d'un fait condition la situation de nécessité afin d'éviter que l'application du droit ne génère un coût social excessif Sa réalisation requiert toujours une pondération des intérêts en conflit Seulement lorsqu'un coût social excessif ne peut être évité l'état de nécessité intervient dans le cadre des obligations secondaires de la responsabilité internationale en tant que circonstance atténuante After much hesitation the International Law Commission codified the state of necessity as a circumstance precluding wrongfulness in the field of State responsibility This study aims to demonstrate that it is a much wider mechanism essential to international law and strictly connected to its own characteristics It performs the function of limiting the substantial obligations of States in case of the realization of a fact condition a situation of necessity in order to avert an excessive social cost born out of law implementation It always works through a balance of conflicting interests Only when a social cost cannot be avoided the state of necessity under the features of a mitigating

circumstance enters the field of secondary obligations relating to international responsibility

**Evolución de las características y de los principios del derecho internacional ambiental y su aplicación en Colombia** Claudia María Rojas Quiñónez, 2004 El derecho ambiental está integrado en su nivel normativo por las fuentes tradicionales y comunes a cualquier otra rama del ordenamiento jurídico El marco jurídico internacional ha sido reconocido como una de sus principales fuentes hasta el punto de señalarse que define hoy en día el criterio o pauta de la civilización ambiental Si la Declaración Universal de los Derechos del Hombre define la frontera que separa un estado de civilización y otro de barbarie las normas internacionales en materia ambiental delimitan el ámbito del estado de civilización ecológica del estado de barbarie Este concepto de civilización es para Jiménez de Parga la más importante de las funciones que despliegan estas normas por encima incluso de su propia fuerza jurídica
