Biology MCAS
Review Preview

The way I used these MCAD Review Worksheets in class is as follows. Starting about six weeks before the Biology MCAD I would have "MCAD Review Fridays." I divided the class into teams. I put a set of tables at the front of the classroom, with paper and pencils set out. Each student would take a turn coming up to the table. I would start the questions on the screen. We would go over the questions. I would explain how the state asked the questions, and what the students should look for. The students would write down the correct answer. If they got a right the team would get a point. The team with the most points at the end of class would get some type of prize. I found that conducting the review in this manner made each student participate. This also gave me a few ways to answer the concern that the students would be tested on

These reviews were extremely beneficial to my students. My student's progress exceeded that of all students from other teachers at the school I worked at.

1. teacher deployed every condition first (before the students or co-teacher). Therefore, all the subjects have two different levels and three different teachers.
