1.DR. SANGEETA SHROFF 2. DR. DIVYA SHARMA 3. DR. GOPA SHARMA 4. SMT. MANJUSHA TIWARI, PREFACE Education has always been more than the transmission of knowledge it is the shaping of minds the cultivation of character and the nurturing of wisdom In today's rapidly changing world where information is abundant yet understanding often fragmented the need to reconnect education with the timeless insights of philosophy has never been greater This book Foundations of Wisdom Integrating Philosophical Thought and Educational Vision emerges from that conviction The chapters in this volume are built upon the belief that philosophy is not confined to abstract thought but is a living force that can illuminate the paths of learning teaching and human growth By exploring diverse philosophical traditions and weaving them into contemporary educational practices this book seeks to bridge the gap between reflection and application It offers a vision of education that is holistic ethical and future oriented one that respects both reason and imagination discipline and creativity This work is intended not only for scholars and educators but also for learners policy makers and anyone who wishes to engage in the deeper questions of what it means to learn and to teach The ideas presented here encourage dialogue across disciplines and cultures fostering a sense of shared responsibility in shaping education that uplifts both the individual and society As you turn these pages may you discover that wisdom is not a static inheritance but an evolving foundation one that can guide us in creating educational systems rooted in purpose justice and human dignity Editors Dr Sangeeta Shroff Dr Divya Sharma Dr Gopa Sharma Smt Manjusha Tiwari *The Elements of Moral Philosophy* James Rachels, 1999 Firmly established as the standard text for undergraduate courses in ethics this concise lively book combines clear explanations of the main theories of ethics with discussions of interesting examples Topics covered include famine relief euthanasia homosexuality and the treatment of animals The text's versatility allows it to be widely used not only in ethical theory courses but also in applied ethics courses of all kinds **Problems in Legal Ethics** Mortimer D. Schwartz, 2003 *Evolution and the Foundations of Ethics* John Mizzoni, 2017-02-03 If human biological evolution is part of our worldview then how do commonplace notions of ethics fit in To ask the question what does evolution imply about ethics we must first be clear about what we mean by evolution Evolution and the Foundations of Ethics discusses four models of evolution represented by Darwin Dawkins Gould and Haught We must also be clear about what we mean by ethics Do we mean metaethics If so which variety With metaethical theories such as Error Theory Expressivism Moral Relativism and Moral Realism theorists are attempting to

explain the general nature status and origins of ethics In the first four chapters of this book Part I John Mizzoni examines how metaethical theories fit with evolution Next in asking about the implications of evolution for ethics do we mean normative ethics Theorists who work with normative ethical theories such as Virtue Ethics Natural Law Ethics Social Contract Ethics Utilitarian Ethics Deontological Ethics and Ethics of Care articulate and defend a normative ethics that people can and do use in a practical way when deliberating about specific actions rules and policies The next six chapters Part II look at how normative ethical theories fit with evolution A full reckoning of ethics and evolution demands that we consider the range of ethical elements both metaethical and normative Thus this book looks at what several different models of evolution imply about four metaethical theories and six normative ethical theories This book will be of interest to scholars interested in the intersection of evolutionary theory and ethical theory
