great pioneers of computer technology and winner of the ACM s A M Turing Award the most prestigious award in computer
science he has made substantial contributions to the development of programming languages compiler construction
programming methodology and hardware design While working at ERH Zurich he developed the languages Pascal and
Modula 2 He also designed an early high performance workstation the Personal Computer Lilith and most recently the
language and operating system Oberon While Wirth has often been praised for his excellent work as a language designer and
engineer he is also an outstanding educator something for which he is not as well known This book brings together
prominent computer scientists to describe Wirth s contributions to education With the exception of some of his colleagues
such as Professors Dijkstra Hoare and Rechenberg all of the contributors to this book are students of Wirth The essays
provide a wide range of contemporary views on modern programming practice and also illuminate the one persistent and
pervasive quality found in all his work his unequivocal demand for simple solutions The authors and editors hope to pass on
their enthusiasm for simple engineering solutions along with their feeling for a man to whom they are all so indebted
