## Los Angeles Daily News Voting Guide:

**The Road to Congress 2004** Sunil Ahuja, Robert E. Dewhirst, 2005 Across the country candidates run for political offices in every election and struggle to win those contests Undoubtedly for some the combat is less gruelling than for others But for all candidates seeking an elective office means going through the hoops to win in a primary and then in the general election This book is designed to lead the readers to see the candidates as individuals struggling to win elections In so doing the authors address a number of questions How do these candidates deal with the whole medley of issues confronting their campaigns What kinds of decisions do they make and how do they do so What is the role of parties issues and candidates in congressional races What about campaign strategies and consultants What of the money and the media At the end of the day based upon a variety of selected races from across the nation our aim in this book is to provide the readers with a detailed understanding of contemporary campaigns and elections in congressional contests at the individual level This is a unique approach In the last decade or so a number of books have regularly provided analyses of contemporary campaigns and elections However these works have used aggregate data to make national generalisations They have examined campaigns and elections from a broad national perspective The authors focus on the individual level instead will not only supplement our understanding of contemporary congressional elections but also show a previously unseen side of these contests The hope is that readers will learn a good deal about how candidates run campaigns and win or lose those contests The focus is strictly on Congress In this book the authors draw upon races for the House and Senate contested in 2004 *The Film Daily Directors' Annual and Production Guide* ,1929 Reforming Legislatures Peverill Squire, 2024-06-26 Winner of the 2025 Virginia Gray Book Award APSA Section 22 State Politics and Policy Legislatures are ubiquitous in the American political experience First created in Virginia in 1619 they have existed continuously ever since Indeed they were established in even the most unlikely of places notably in sparsely populated frontier settlements and functioned as the focal point of every governing system devised Despite the ubiquity of state legislatures we know remarkably little about how Americans have viewed them as organizations in terms of their structures rules and procedures But with the rise of modern public opinion surveys in the twentieth century we now have extensive data on how Americans have gauged legislative performance throughout the many years That said the responses to the questions pollsters typically pose reflect partisanship policy and personality Generally respondents respond favorably to legislatures controlled by their own political party and those in power during good economic times Incumbent lawmakers get ratings boosts from having personalities home styles that mesh with those of their constituents These relationships are important indicators of people s thoughts regarding the current performance of their legislatures and legislators but they tell us nothing about attitudes toward the institution and its organizational characteristics This study offers a unique perspective on what American voters have historically thought about legislatures as organizations and legislators as representatives Rather than focusing on responses to surveys that ask

respondents how they rate the current performance of lawmakers and legislatures this study leverages the most significant difference between national and state politics the existence of ballot propositions in the latter At the national level Americans have never had any say over Congress s structure rules or procedures In contrast at the state level they have had ample opportunities over the course of more than two centuries to shape their state legislatures The data examined here look at how people have voted on more than 1 500 state ballot propositions targeting a wide array of legislative organizational and parliamentary features By linking the votes on these measures with the public debates preceding them this study documents not only how American viewed various aspects of their legislatures but also whether their opinions held constant or shifted over time The findings reported paint a more nuanced picture of Americans attitudes toward legislatures than the prevailing one derived from survey research When presented with legislative reform measures on which concrete choices were offered and decisions on them had to be made the analyses presented here reveal that counter to the conventional wisdom that people loved their representatives but hated the legislature voters usually took charitable positions toward the institution while harboring skeptical attitudes about lawmakers motives and behaviors
