This can be seen not only in professionalisation in fields such as faculty management or in areas of quality assurance and internationalisation but also in the need for exchange and training in academic leadership such as that of deans or study deans or of university leadership in general. The Dialogue on Innovative Higher Education Strategies DIES is addressing this need in emerging countries by building platforms of exchange and offering training courses. Not only is the programme supporting capacity building of human resources but it is also specifically focusing on inducing change within the universities such as introducing new instruments or tools in the area of quality assurance and internationalisation and addressing specific challenges or setting up new structures in the form of projects in the frame of the training. The National Multiplication Trainings Programme under DIES is further addressing the sustainability and multiplication of the DIES Programme that is alumni are enabled to implement capacity building in higher education leadership and management in their national context. The articles within this volume of the Potsdamer Beitr ge zur Hochschulforschung Potsdam Contributions to Higher Education Research analyse and share the experiences of such training programmes held in Colombia, Democratic Republic of Congo, Guinea, Malaysia, Kenya and Uganda. They all revolve around the best ways to address the needs and challenges in higher education leadership and management and in building capacities in these areas. *Agricultural, Biosystems, and Biological Engineering Education* Umezuruike Linus Opara, 2024-09-30 Agricultural engineering developed as an engineering discipline underpinned by physics applies scientific principles, knowledge and technological innovations in the agricultural and food industries. During the last century there was exponential growth in engineering developments which has improved human wellbeing and radically changed how humans interact with each other and our planet. Among these Agricultural Mechanization is ranked among the top 10 in a list of 20 Top Engineering Achievements of the last century that have had the greatest impact on the quality of life. While many success stories abound the problems of low appeal among students, identity crises and limited job opportunities in many climes continue to trouble the discipline's future in many parts of the world. Yet agriculture and agricultural engineering remain fundamental to assuring food and nutrition security for a growing global population. Agricultural Biosystems and Biological Engineering Education provides the first comprehensive global review and synthesis of different agricultural biosystems and biological engineering education approaches including a detailed exposition of current practices from different regions. Key

Features Describes novel approaches to curriculum design and reform Outlines current and emerging epistemology and pedagogies in ABBE education Provides a framework to grow agricultural engineering in Africa and other developing regions Highlights the role of ABBE education in the context of the SDGs Presented in 3 parts and containing 42 chapters this book covers the historical evolution of agricultural engineering education and discusses the emergence of biological and biosystems engineering education It will appeal to engineers and other professionals education planners and administrators and policy makers in agriculture and other biological industries Chapters 4 11 19 32 and 41 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
