Reform and Revolution in France Peter M. Jones,Peter Jones,1995-09-21 This textbook has been written to help teachers and students to pilot their way through the enormous and ever expanding literature on the French Revolution The author makes a conscious effort to combine social and political interpretations of the origins of the Revolution and offers a synthesis which takes full account of current debates He also seeks to restore the Revolution to its domestic environment

Notwithstanding the powerful contemporary myth of rupture the author argues that the dramatic events of 1789 need to be considered alongside the reform achievements of Bourbon absolute monarchy The result is a new account of the gestation of the Revolution which is both up to date and satisfying in its range of vision *Le communisme rural en France* Laird

Re-imagining the Nation Mette Zølner,2000 Why are national identities imagined in one way rather than in another The book analyses national imaginations as an on going reconstruction process in a political and social context in which several imaginations of the nation struggle to impose their conception Focusing on a fundamental element of any collective identity namely the Other the book looks at the reconstruction of national identities by actors in political debates on immigration in the late 1980s and 1990s particularly associations and political clubs which were in favour of and against the

presence of immigrant minorities in their respective countries. Thus the book investigates different ways of imagining the same nation in two old European nation states namely France and Denmark which differ with regard to their nation building processes, their Second World War history, their memory of colonialism and their experience of immigration. It is thus possible to illustrate that existing ideas of the nation and memories of historical events shape the way in which the nation could be reimagined in the 1980s and 1990s.
