modern day Chinese thinking across the spheres of politics economics and society It reflects on the major schools of Chinese thought including Confucianism Daoism and Zen Buddhism providing a historical perspective on the ideological development of China in terms of the relationship between man and nature social ethics political governance poetry education aesthetic criticism and art theory It also explores primary aspects of Chinese poetics and aesthetics with reference to the interaction between the endogenous theories and their western counterparts Written by a leader in Chinese Aesthetics against the background of both globalization and glocalization at home and abroad this is a key read for all those interested in the cultural philosophical and aesthetic underpinnings of contemporary China      **Dougong** Alexandra Harrer,2025-07-31 This is the first English language study devoted to dougong the block bracket cluster widely regarded as the epitome of traditional Chinese architecture For almost two millennia dougong have been central to the multipartite frame structure of wooden buildings connecting columns with beams supporting projecting eaves and providing resistance to earthquake damage They have enabled and required builders to ensure both the functionality and the moral dimension of their designs through the thoughtful use of appropriately graded timbers and corresponding methods of modular design that determine the size and quality of a building in keeping with the social standing of its owner Richly illustrated with original high quality photographs and drawings this book explores the engaging story of dougong as technical artifacts that embody Chinese culture Alexandra Harrer delves into the previously unresolved relationship between standard dougong and their regional and local variations in the rhetoric of Chinese construction offering an alternative to sociopolitical caste as a means of interpreting these differences She untangles the lengthy selection process and trial and error development of the block bracket cluster before codification to reveal how design idiosyncrasies derived from an unlikely combination of legal codes and ethical imperatives For example dougong with arms projecting at a 45 or 60 degree angle from the wall plane long dismissed as unorthodox are shown to be a subtle design expression that yields to authority while it seeks to exploit archi cultural standards Harrer argues that the ethical dimensions of graphic shapes and the culturally charged space that dougong occupy are key to understanding this creative process      *Islamic Chinoiserie* Yuka Kadoi,2019-07-31 The Mongol invasion in the thirteenth century marked a new phase in the development of Islamic art Trans Eurasian exchanges of goods people and ideas were encouraged on a large scale under the auspices of the Pax Mongolica With the fascination of portable objects brought from China and Central Asia a distinctive hitherto unknown style Islamic chinoiserie was born in the art of Iran Highly illustrated Islamic Chinoiserie offers a fascinating glimpse into the artistic interaction between Iran and China under the Mongols By using rich visual materials from various media of decorative and pictorial arts textiles ceramics metalwork and manuscript painting the book illustrates the process of adoption and adaptation of Chinese themes in the art of Mongol ruled Iran in a visually compelling way The observation of this unique artistic phenomenon serves to promote the understanding of the artistic diversity of Islamic art in the Middle Ages Key Features Covers various media of decorative and pictorial arts from
