Technology and the Politics of Instruction Jan Nesor, 2006 In this study of computer mediated instruction CMI in a U S research university that is the site of nationally known innovations in this area Jan Nesor traces the varying material and organizational entanglements of a constantly reconfiguring network of people things categories and ideas that are sometimes loosely sometimes tightly entangled in forms of CMI He unfolds how the different forms and meanings of CMI policy and practice were constructed over time across departments and in relation to students academic trajectories Tying together a range of issues usually separated in discussions of instructional technology and examining often slighted topics such as the articulations of local and national practices this book questions the common vocabulary for making sense of CMI and contributes to educational change theory by showing how CMI has evolved both from the top down and the bottom up

Technology and the Politics of Instruction is distinctive in its multi level approach and in the breadth of its conceptual frame Departing from the mainstream research on instructional technology to focus on mundane and widespread forms of CMI PowerPoint slides CD ROMs self paced labs and the like Nesor views these from multiple standpoints not just what they mean for professors but also for administrators and students The effect is to displace the typical emphasis in CMI research

from cutting edge high resource artifacts and systems the importance of which is not questioned to the politics and organizational processes that shape the uses of such things This book is intended primarily for scholars and students in the fields of educational and more broadly organizational change the politics and sociology of education curriculum theory higher education and educational administration and will also interest instructional technologists and technology developers

The One-person Library ,2002 The Impact of Internal and External Influences on Memory and their Relevance to Legal Decisions Fabiana Battista,Antonietta Curci,Ivan Mangiulli ,Henry Otgaar,2024-08-02 The fallibility of memory has been often demonstrated A plethora of studies has focused on external influences that can affect memory reports such as suggestive questioning Adopting different paradigms e g misinformation memory conformity the recurrent pattern of findings of these studies is that suggestion can make people prone to falsely recall details that were never experienced i e commission errors false details In addition suggestion can make them unable to recall truly experienced events or event related details However internal influences can also affect memory One such internal influence is deception In the last decade several studies have investigated how memory can be affected by deception Specifically these studies have shown that a person who has intentionally deceived the listener about an experienced event subsequently when the person comes forward with the truth shows an impaired memory for such an event This line of research examined the detrimental effects on memory by taking into account different strategies to deceive e g false denials feigned amnesia and fabrication and found that the memory outcomes due to deception can vary based on the strategy used to deceive A number of studies has also demonstrated that another type of deception known as self deception can influence our memory This strategy relies on the act of deceiving our own selves and seems to reduce the recall of negative memories The understanding of the effects of external e g suggestion and internal e g deception self deception on memory is important not only in order to gain more fundamental information on how memory works but also because of the relevance of memory functioning within the legal context Memory distortions for example inaccurate eyewitness testimony can lead to impactful legal decisions such as wrongful convictions Several studies have underlined the harmful consequences of distorted statements Additional support is found in databases from various worldwide associations who strive to obtain fair justice for people involved in wrongful convictions cases for instance www.innocenceproject.org Therefore it is important that researchers continue to provide evidence on the mnemonic impact of internal and external factors that influence legal practitioners to help avoid miscarriages of justice **The Multiplayer Classroom** Lee Sheldon,2021-03-04 The Multiplayer Classroom Game Plans is a companion to The Multiplayer Classroom Designing Coursework as a Game now in its second edition from CRC Press This book covers four multiplayer classroom projects played in the real world in real time to teach and entertain They were funded by grants or institutions collaborations between Lee Sheldon as writer designer and subject matter experts in various fields They are written to be accessible to anyone designer educator or layperson interested in game based learning The
