

HOW TO CONNECT TRANSFORMERS TO TRACK

In simple layouts the order of the two wires connecting the transformer to the track does not matter. However, if you are going to use insulated track blocks or accessories requiring a fixed voltage connection, such as No. 022 Switches, No. 456 Coal Ramp or No. 3656 Corral Platform, start by wiring the transformer to track exactly as shown. For further information about Lionel transformers see the

section on "Power Supply" and the detailed instruction sheet furnished with each transformer.

In some cases you may find that the wiring directions given in the instruction leaflets differ somewhat from the diagrams in this booklet. This is because in many Lionel transformers several different combinations of output terminals will give the voltage required for operating trains.
