Environment & Ecology Fact Book For Children* Bold Kids, 2022-03-07 If you're looking for a way to educate your children about the dangers of air pollution here are a few interesting facts about air pollution These toxins can affect human health in a number of ways For example if you live in a city you can be exposed to high levels of benzene a carcinogen You can also be exposed to dangerous amounts of lead and asbestos which can lead to a variety of different illnesses You may be surprised to learn that air pollution is one of the world's most serious environmental problems While we don't notice it constant exposure to air pollution poses high health risks including the risk of premature death It's not easy to get your kids to understand all the facts about the dangers of air pollution but a basic knowledge of the effects of the problem can help them make the right decisions about their health The main cause of air pollution is the production of pollutants like benzene These particles have a diameter of 2.5 micrometers which makes them more likely to enter the lungs and cardiovascular system As a result they can increase the risk of developing certain diseases including cancer and heart disease According to WHO guidelines the concentration of PM2.5 in the air should be less than 10 micrograms per cubic meter per year However most of the world's population lives in areas that have levels of benzene higher than this limit **Edelman and Kudzma's Canadian Health Promotion Throughout the Life Span - E-Book** Marian Luctkar-Flude, Jane Tyerman, Shannon Dames, 2025-02-27 Gain the knowledge and skills you need to promote health and prevent disease in Canada Edelman and Kudzma's Canadian Health Promotion Throughout the Life Span Second Edition describes public health concepts from a Canadian perspective helping you to improve community health and reduce health inequities within a diverse population Covering the needs of each age and stage of life this book discusses care of the individual family and community all based on the latest research and trends in Canadian health promotion New chapters address the timely topics of Indigenous health and 2SLGBTQI health Written by respected Canadian educators Marian Luctkar-Flude Shannon Dames and Jane Tyerman this book is the only Canadian nursing health promotion text on the market The Horn Book Guide to Children's and Young Adult Books, 2006 *Air Pollution* Bold Kids, 2021-10-21 Air pollution can be described simply as any gas liquid or vapor that enters the atmosphere and is breathed in Air pollution is most commonly described as either primary mainly chemical pollutants or secondary
