## What's New in Mastercam X2

Significant new functionality has been added through Maintenance releases since the initial release of Mastercam X in July 2005. Maintenance customers gained access to two complete products (Wire in MR1 and Art in MR2), depending on their licenses. The AutoCursor and General Selection interaction continued to evolve to be much easier to use and more intuitive as we responded to input from Mastercam X customers. We introduced and then added to an entirely new suite of high speed toolpaths (HST). Advanced Multiaxis toolpaths greatly expanded Mastercam's capabilities in that application. We made it simpler to manage and move machine and control definitions by implementing Setdirs functionality as the new Project Manager. We continued to deliver videos to help our customers understand how the new features could help them in their businesses.

This What's New document briefly describes the features added or changed in each of the Maintenance releases since the initial Mastercam X release. All of these features have been incorporated in Mastercam X2, along with important new features such as additional high speed, multisurface, and multiaxis toolpaths; new file open dialogs; new change recognition and tracking functions; Art enhancements; totally redesigned Automatic Toolpathing (ATP); and much more.

*Note: Bug fixes are listed only for the Mastercam X2 release.*
