STARTER TIPS

FOR BEST RESULTS READ the following start up tips before using your electric turkey fryer, seafood kettle and boiler. Please remember this is an ELECTRIC turkey fryer, and has different characteristics than a gas fryer.

PRE-HEATING oil or water may take up to 50 minutes. Take advantage of this time to prepare your turkey or other foods for cooking. For optimum performance, completely pre-heat unit to cooking temperature before frying or boiling foods. Keeping THE LID ON during pre-heating and cooking cycles will reduce pre-heating time, and keep temperature more consistent.

14 POUNDS is the **LARGEST** recommended turkey to cook. Any turkey over 14 pounds may not cook completely, especially in center of breast and drumsticks. When cooking more than one turkey, or more than one basket of food, allow enough time for the oil or water to re-heat to designated temperature before adding additional food.
