This is the definition of an element.

What is the correct order for the hierarchy of biological organization from the least to the most complex? See Concept 1.1 (Page) - answer molecule, organelle, cell, tissue, organ, organ system, organism, population, community, ecosystem

Each level of biological structure builds on the level before it.

No amino acid molecule by itself can speed up or catalyze reactions between other molecules; however, when amino acids are joined together to make a protein with catalytic properties, the new structure (enzymatic protein) can speed up the rate of a specific chemical reaction. What does this illustrate? See Concept 1.1 (Page) - answer emergent properties

A molecule such as a protein has attributes not exhibited by any of its component parts (e.g., amino acids). Therefore, novel properties are emerging that were not present at a simpler level of organization.
