Reflections: Discovering Life in the Universe

Descriptions: This questionnaire is designed as a guide checklist of whether a student has actually mastered the performance-ideas for this chapter. It should be noted if they have. Keep in mind that these items refer to a *total* questionnaire to selected topics from the chapters, intended to give a broad view of what will need to come through study.

11. The gas particles inside a lower balloon, causing it to expand, will be moving at a faster (larger) rate.
12. The gas particles inside a lower balloon, causing it to contract, will be moving at a slower (smaller) rate.
13. The rate of molecular motion decreases as you go higher.

Using that model of the balloon should not depend on size, the gas particles should still move faster. Thus, think about what would happen if the gas in the balloon were hot around the burner's flame, remembering that faster gas motion means higher temperature and that the burner jet is very sensitive to temperature.
