

MAPWORK GRADE 12 NOTES - GEOGRAPHY STUDY GUIDES

5.1 Introduction

Mapwork is a practical section of Geography where you are required to apply all the different skills, techniques and the theory that you have learnt. It consists of the following sections:

- Mapwork calculations
- Reading, interpretation and analysis of theory
- Geographical Information Systems (GIS)

Maps tell you a story about a place. Look at all the information given on the map to interpret it:

- What is the name on the top of the map?
- Look at the latitude and longitude. Get an idea where the map is. For example, 20°S would indicate it is in Limpopo.
- Look at all the information provided (magnetic declination information, scale of the map, contour interval, map projection used) in the 'margins' of the map.
- Look at the bottom of the map, for the diagram showing the map sheet reference. It may show additional information such as oceans or borders.
- Notice where roads or railways go off the map. The town they lead to may give you clues.
- Make use of the key/reference list to identify features. Remember, the first word in the reference list refers to the first picture and not both pictures.

Look for the following aspects on the map:

- Is this a high or low rainfall area? Is the rainfall seasonal?
- What kinds of rivers are visible and how many are there?
- Identify the urban and rural areas.
- Identify the different land uses in the mapped area, for example, agricultural/industrial/built-up areas.
- What factors may have affected the location of various land uses?
For example, industry alongside a perennial river.
- Identify the type of farming – is it commercial or subsistence?
- Look at the relief – is it flat or hilly, are the slopes steep or gentle?
- Look at the contour lines to determine this.

Look at the information given in the orthophoto:

- Is the orthophoto labelled? If not, check the numbers or letters in the question, for example: 'Identify land use labelled G on orthophoto' – G will only be on one of the photos.
- Is a rectangle drawn around the area covered by the orthophoto? If not, orientate the photo to the map.
- Read the instructions carefully as you may need to use both the map and the photograph to answer a question.
- Make use of all the information on the orthophoto, for example, road names, heights, etc.

Children, Young People and Critical Geopolitics Matthew C. Benwell, Peter Hopkins, 2017-05-15 Young people and in particular children have typically been marginalised in geopolitical research positioned as too young to understand or relate to the adult dominated world of international relations Integrating current debates in critical geopolitics and political geography with research in children s geographies childhood studies and youth research this book sets out an agenda for the field of children s and young people s critical geopolitics It considers diverse practices such as play activism media

consumption and diplomacy to show how children's and young people's lives relate to wider regional and global geopolitical processes. Engaging with contemporary concepts in human geography including ludic geopolitics affect emotional geographies intergenerationality creative diplomacy popular geopolitics and citizenship the authors draw on geopolitical research with children and young people from Europe Asia Australasia Africa and the Americas. The chapters highlight the ways in which young people can be enrolled ignored dismissed empowered and represented by the state for geopolitical ends. Notwithstanding this state power the research presented also shows how young people have agency and make decisions about their lives which are influenced by wider geopolitical processes. The focus on the lives of children and young people problematises and extends what it is we think of when considering the geopolitical which enriches as well as advances critical geopolitical enquiry and deserves to be taken seriously by political geographies more broadly.
