Blackburn,2017-10-13 In this powerful call to action conservationist and environmental lawyer Jim Blackburn offers an unconventional yet feasible plan to protect the Texas coast The coast is in danger of being damaged beyond repair due to the gradual starvation of freshwater inflows to its bays the fragmentation of large tracts of land and general public neglect Most importantly it is threatened by our denial that the coast faces major threats and that its long term health provides significant economic benefits To save coastal resources a successful plan needs to address the realities of our current world The challenge is to sustain an economy that creates optimism and entrepreneurship while considering finite natural resources In other words a successful plan to save the Texas coast needs to be about making money Whether visiting with farmers and ranchers or oil and chemical producers Blackburn recognizes that when talking about the natural environment in monetary terms people listen Many of the services we get from the coast are beginning to be studied for their dollar values a trend that might offer Texas farms and ranches the potential for cash flow which may in turn alter conservation practices throughout Texas and the United States Money alone cannot be the only motivation for caring about the Texas coast though Blackburn encourages Texans to get to know this landscape better Beautifully illustrated and accessibly written A Texan Plan for the Texas Coast weaves together a challenging but promising plan to protect the coast through economic motivation thoughtful litigation informed appreciation and simple affection for the beauty and life found on the Texas coast *Storm Data* ,2006-06 *The Texas Landscape Project* David A. Todd,Jonathan Ogren,2016-06-14 The Texas Landscape Project explores conservation and ecology in Texas by presenting a highly visual and deeply researched view of the widespread changes that have affected the state as its population and economy have boomed and as Texans have worked ever harder to safeguard its bountiful but limited natural resources Covering the entire state from Pineywoods bottomlands and Panhandle playas to Hill Country springs and Big Bend canyons the project examines a host of familiar and not so familiar environmental issues A companion volume to The Texas Legacy Project this book tracks specific environmental changes that have occurred in Texas using more than 300 color maps expertly crafted by cartographer Jonathan Ogren and over 100 photographs that coalesce to fashion a broad portrait of the modern Texas landscape The rich data compiled by author David Todd are presented in clearly written yet marvelously detailed text that gives historical context and contemporary statistics for environmental trends connected to the land water air energy and built world of the second largest and second most populated state in the nation An engaging read for any environmentalist or conscientious citizen The Texas Landscape Project provides a true sense of the grand scope of the Lone Star State and the high stakes of protecting it To learn more about The Meadows Center for Water and the Environment sponsors of this book s series please click here **The Oil Weekly** ,1920 **Markets of the U.S. for Business Planners: BEA regions 92-183**
