more and more of a prevalent methodology within sociology As ethnography gains prominence within the discipline its focus theoretical underpinnings and narrative styles are also expanding to the yet unexamined worlds and institutions of society Politics political institutions and those working in politics state officials politicians and activists have so far missed the lens of the ethnographer As a group politicians and those in politics can be found in every corner of the world While political systems and politicians are by no means the same in every country what brings these people together to be part of the political process Ethnography is uniquely equipped to look microscopically at the foundations of political institutions and their attendant set of practices just as it is ideally suited to explain why political actors behave the way they do and to identify the causes processes and outcomes that are part and parcel of political life The volume based on a special issue of Qualitative Sociology has a two fold purpose to bring politics into the ethnographic literature and of ethnography in studies of politics The case studies included are based on the research of ethnographers studying the various level of politics in Brazil Japan El Salvador Bosnia the Philippines India and the United States It will be of interest to those in the sociology of politics political science and those looking for ethnographic research on a global level **Knowing How to Know** Narmala Halstead, Eric Hirsch, Judith Okely, 2008-04-01 This volume examines some crucial issues in the conduct of fieldwork and ethnography and provides new insights into the problems of constructing anthropological knowledge How is anthropological knowledge created from fieldwork whose knowledge is this who determines what is of significance in any ethnographic context and how is the fieldsite extended in both time and place Nine anthropologists examine these problems drawing on diverse case studies These range from the dilemmas of the religious refashioning of the ethnographer in contemporary Indonesia to the embodied knowledge of ballet performers and from ignorance about post colonial ritual innovations by the anthropologist in highland Papua to the skilled visions of slow food producers in Italy It is a key text for new fieldworkers as much as for established researchers The anthropological insights developed here are of interdisciplinary relevance cultural studies scholars sociologists and historians will be as interested as anthropologists in this re evaluation of fieldwork and the project of ethnography Ethnography for Education Christopher Pole, Marlene Morrison, 2003-12-16 Ethnography is a distinctive approach for educational research The authors argue that the last decade has seen ethnography come of age not only as a way of doing research but also as a way of theorizing and making sense of the world Their approach is concerned with ethnography as process and ethnography as product This critical celebration of ethnography explores what it can achieve in educational research The book features Thorough discussion of definitions of ethnography and its potential for use within educational research Critical introductions to the principal approaches to ethnography Discussions of data analysis and representation and of the challenges facing ethnography Use of educational examples from real research projects throughout The book offers a distinctive contribution to the literature of ethnography taking readers beyond a simplistic how to approach towards an understanding of the wider contribution ethnography can make to our understanding of educational
