

# 'Kodak' S-AV Programmable Dissolve Control

The 'Kodak' S-AV Programmable Dissolve Control is a digital dissolve unit controlled by a microprocessor. It was developed for use with two-projector slide sound shows and there is a lot more to it than its compact form would suggest.

The meaning and effectiveness of a slide sound show can be increased significantly by using this unit. The change from one slide to the next gives many choices: cut, dissolve (with five dissolve time settings), superimpose, animation, flash, freeze, swing effects. It is possible to combine any of these effects in any order.

A lot of thought has been put into the development of this good value unit, enabling all these visual effects to be carried out quickly and easily. This, in turn, has a beneficial effect on the cost of making a slide sound show.

A summary of technical details can be found on the back of this sheet.

Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
