1. **Identify the problem.** The first step is to identify the problem or issue that needs to be addressed. This involves understanding the current situation, the goals, and the constraints.

2. **Analyze the problem.** Once the problem is identified, the next step is to analyze it. This involves breaking down the problem into smaller, more manageable parts and understanding the underlying causes.

3. **Generate solutions.** The third step is to generate potential solutions. This involves brainstorming ideas and considering different approaches to solve the problem.

4. **Evaluate solutions.** The fourth step is to evaluate the potential solutions. This involves comparing the solutions against the goals and constraints and determining which solution is the most effective.

5. **Implement the solution.** The final step is to implement the chosen solution. This involves putting the solution into action and monitoring its progress.
