**Power in a Changing World Economy** Benjamin J. Cohen, Eric M.P. Chiu, 2013-10-30 This book is about power in a changing world economy Though power is ubiquitous in the study of International Political Economy the concept is underdeveloped in formal theoretical terms This collection of essays analyses recent experience in East Asia to advance our theoretic understanding of state power in IPE Over the last quarter century no other region of the world has had a greater impact on the global distribution of economic resources and capabilities China with its peaceful rise now stands as the second largest national economy on the face of the earth South Korea and Taiwan have become industrial powerhouses Hong Kong and Singapore are among the world s most important financial centres and new poles of growth have emerged in several southeast Asian countries all while Japan long the region s dominant market has slipped into seemingly irreversible decline The volume s nine essays contributed by leading scholars in the United States Britain and Taiwan aim to extract relevant inferences and insights from these developments for the study of state power All are framed by a core agenda encompassing four key clusters of questions concerning the meaning sources uses and limits of power These essays ask What new lessons are offered for power analysis in International Political Economy

Post-Referendum Sudan National and Regional Questions Wassara, Samson Samuel, Al-Abdin, Al-Tayib Zain, 2015-03-02 The fate of Sudan by then the largest country in Africa was clearly decided when results of the referendum vote were announced in February 2011 Policy makers scholars and the international community began to grapple with critical issues that might arise after the independence of South Sudan and how different stakeholders were likely to react during the period of uncertainty Political developments in Sudan were long term outcomes of post cold war revolutions in the world system after the Soviet Union collapsed A domino effect of such events swept across Eastern Europe with some manifestations in the Horn of Africa The fall of Mengistu Haile Mariam marked the beginning of the redrawing of the map of Africa and posed a challenge to the long held principle of preservation of colonial borders that had been enshrined in the Charter of the Organisation of African Unity The precedent set by the independence of Eritrea seemed to encourage southern Sudan to press forward for independence through a two pronged approach of armed struggle and diplomacy led by the Sudan People s Liberation Army Movement This book attempts to understand national regional and continental dimensions of the unresolved issues that could result in the escalation of conflict in the Sudan It examines internal dynamics of the Sudan after secession of the south and how these dynamics might affect neighbouring countries in the geopolitical regions the Horn of Africa the Great Lakes Region and Central Africa A section of the book is dedicated to dynamics within South Sudan as a new state Post conflict South Sudan as country was marked by extreme poverty lack of infrastructure and prevalence of inter communal armed violence This book proposes possible policies to prevent the country from descending into a state of economic and social chaos The book

provides the argument that equitable and rational transformative socio economic programmes and policies could greatly reduce potentials for conflict This book calls on policy makers to pursue policies that could lead to concrete projects planned to alleviate poverty and provision of basic social services such as education health and safe water The book comes to the conclusion that political stability will depend on collective actions of stakeholders to ensure that peace prevails both in the north and the south to guarantee human security in the region

**Global Economic Cooperation** Rajat Kathuria, Neetika Kaushal Nagpal, 2015-11-23 This book discusses issues such as global financial crisis and global governance food security energy sustainability the global financial system trade and protectionism and growth and employment Since the outbreak of the financial as well as national debt crises in the Euro zone the focus of the G20 has shifted back to addressing short term issues These issues range from the dynamic effects of global imbalances and the appropriate degree of financial sector regulation to questions of austerity versus growth and the lack of a comprehensive framework for managing the international monetary system A further issue is the relevance of the G20 agenda for emerging market economies Global economic recovery still remains fragile and downside risks to global growth remain Additionally much of the agenda of the Seoul Development Consensus for shared growth launched in 2010 has yet to be fulfilled A key discussion point in the book therefore is how to make a tangible and significant difference in peoples lives by implementing an agenda of inclusive growth

Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates

Parliament. House of Commons,2013      Benign Neglect of the Long-term Interest Rate Philip Turner,2013 Large scale central bank purchases of government bonds have made the long term interest rate key in the monetary policy debate How central banks react to bond market movements has varied greatly from one episode to another Driving the term premium in long term rates negative may stimulate aggregate demand And a negative term premium encourages borrowers to lengthen the maturity of their debts Such a reduction in maturity risks makes the financial system

more resilient to shocks and in particular can help emerging economies finance their heavy infrastructure and housing investment needs more safely But an extended period of very low long rates and high public debt creates financial stability risks Interest rate risk in the banking system has grown and some institutional investors face significant exposures Central banks in the advanced economies now hold a high proportion of bonds issued by their governments most of which have so far failed to arrest the rise in the ratio of government debt to GDP Implementing an effective exit strategy will be difficult Current policy frameworks should be reconsidered with a view to clarifying the importance of the long term interest rate for monetary policy for financial stability and for government debt management Abstract
