Sectarianism, De-Sectarianization and Regional Politics in the Middle East Samira Nasirzadeh, Elias Ghazal, Ana Maria Kumarasamy, Eyad Alrefai, Simon Mabon, 2024-01-25 Following the Arab Uprisings new ways of understanding sectarianism and sect based differences emerged But these perspectives while useful reduced sectarian identities to a consequence of either primordial tensions or instrumentalised identities While more recently third way approaches addressed the problems with these two positions the complexity of sectarian identities within and across states remains unexplored This book fills the gap in the literature to offer a more nuanced reading of both sectarian identities and also de sectarianization across the Middle East To do so the volume provides a comparative account looking at Iraq Bahrain Yemen Syria and Lebanon It examines the ways in which sect based difference shapes regional politics and vice versa The book also contributes to burgeoning debates on the role of protest movements in sectarianism Chapters are split across three main sections the first looks at sects and states the second traces the relationship between sects and regional dynamics and the third examines de sectarianization that is the contestation and destabilization of sectarian identities in socio political life Each section provides a more holistic understanding of the role of sectarian identities in the contemporary Middle East and shows how sectarian groups operate within and across state borders and why this has serious implications for the ordering of life across the Middle East

Beyond Gridlock Thomas Hale, David Held, 2017-09-25 It is now conventional wisdom to see the great policy challenges of the 21st century as inherently transnational It is equally common to note the failures of the international institutions the world relies on to address such challenges As the acclaimed 2013 book *Gridlock* argued the world increasingly needs effective international cooperation but multilateralism appears unable to deliver it in the face of deepening interdependence rising multipolarity and the growing complexity and fragmentation that characterise the global order The *Gridlock* authors have now partnered with a group of leading experts to offer a trenchant reassessment of elements of the argument Comparing anomalies and exceptions to multilateral dysfunction across a number of spheres of world politics *Beyond Gridlock* explores seven pathways through and beyond gridlock While multilateralism continues to fall short *Beyond Gridlock* identifies systematic means to avoid or resist these forces and turn them into collective solutions This book offers a vital new perspective on world politics as well as a practical guide for positive change in global policy

Making Sense of Cyber Capabilities for Small States Francis C. Domingo, 2022-03-28 Domingo explores the potential of cyber capabilities for small states in the Asia Pacific the most active region for cyber conflict He develops a systematic explanation for why Brunei New Zealand and Singapore have developed or are developing cyber capabilities Studies on cyber conflict and strategy have substantially increased in the past decade but most have focused on the cyber operations of powerful states This book moves away from the prominence of powerful states and explores the potential of cyber capabilities for small states in the Asia Pacific the most active region for cyber conflict It develops a systematic explanation of

why Brunei New Zealand and Singapore have developed or are developing cyber capabilities despite its obscure strategic value The book argues that the distribution of power in the region and a technology oriented strategic culture are two necessary conditions that influence the development of cyber capabilities in small states Following this argument the book draws on neoclassical realism as a theoretical framework to account for the interaction between these two conditions The book also pursues three secondary objectives First it aims to determine the constraints and incentives that affect the utilization of cyber capabilities as foreign policy instruments Second the book evaluates the functionality of these cyber capabilities for small states Lastly it assesses the implications of employing cyber capabilities as foreign policy tools of small states This book will be an invaluable resource for academics and security analysts working on cyber conflict military strategy small states and International Relations in general
