Trigeminal Neuralgia
Giulia Di Stefano, 2022-11-30 Trigeminal Neuralgia is a unique neuropathic facial pain condition characterized by unilateral paroxysmal pain most often described as stabbing or electric shock like restricted to the distribution of one or more divisions of the trigeminal nerve territory and triggered by innocuous stimuli Trigger zones are reported in virtually the totality of patients and represent the hallmark sign of Trigeminal Neuralgia The development and application of a dedicated software allowed trigger zone overlap profiling of the extraoral and intraoral territories The analysis of the natural history of Trigeminal Neuralgia showed that the failure of the treatment with first line drugs carbamazepine and oxcarbazepine most of the times is not due to the inefficacy of the drug but rather to undesired effects to a level that causes interruption of treatment or a dosage reduction to an insufficient level These results suggest the opportunity to develop a better tolerated drug Winner of the Competition Prize for PhD Thesis 2020 arranged by Sapienza University Press

Small States and EU Governance Jean Micallef Grimaud, 2017-09-06 This book examines a crucial question about small states and their governments influence in the European Union EU decision making processes Are EU small member state governments influential in EU decision making processes In other words do they exercise influence in these processes And if so how and at which stage do they do this This book seeks to answer the above questions by focusing on Malta the smallest state in the EU and whether it exercises influence in uploading its preferences in two distinct stages of EU legislative decision making processes decision shaping formation and decision taking adoption The cases selected and analyzed showcase the Maltese government's behaviour in legislative negotiations in differing EU policy spheres that are extremely relevant to it These are the adoption of EU directives on pyrotechnic articles falling under the EU competition and consumer health and safety policy spheres and on the extension of EU long term residence to beneficiaries of international protection falling under EU immigration policy As

analyzed in the latter chapters of the book Malta s government has achieved varying degrees of success in its exercise of influence in these EU decision making processes Induced plant responses to microbes and insects Corné M. J. Pieterse,Marcel Dicke,Saskia C. M. Van Wees,Erik H. Poelman,2014-04-14 Plants are members of complex communities and interact both with antagonists and beneficial organisms An important question in plant defense signaling research is how plants integrate signals induced by pathogens insect herbivores and beneficial microbes into the most appropriate adaptive response Molecular and genomic tools are now being used to uncover the complexity of the induced defense signaling networks that have evolved during the arms races between plants and the other organisms with which they intimately interact To understand the functioning of the complex defense signaling network in nature molecular biologists and ecologists have joined forces to place molecular mechanisms of induced plant defenses in an ecological perspective In this Research Topic we aim to provide an on line open access snapshot of the current state of the art of the field of induced plant responses to microbes and insects with a special focus on the translation of molecular mechanisms to ecology and vice versa
