Technology News, 2003 **Roundabouts** Jim C. Lee, 2003 The roundabouts controlling traffic at the I 17 Happy Valley Road interchange represent Arizona's first application of modern roundabout traffic control in this manner The construction of roundabouts at this interchange location served to alleviate past congestion and safety issues by reducing off ramp queues and reducing speeds in the area of the I 17 off ramp termini The use of the roundabouts offered flexibility in addressing the complicated traffic interactions of the freeway on and off ramps two way frontage roads and Happy Valley Road Based on this milestone and the overall unique application of roundabout design and function at this particular interchange the I 17 Happy Valley Road roundabouts were studied to help identify possible improvements that could be incorporated at this location and

into future Arizona Department of Transportation roundabout initiatives The anticipated benefits of the improvements include but are not limited to more efficient traffic operations reduced costs on average increased capacity and improved safety due to overall slower speeds through the roundabout The main objectives of this research project include literature review of other state guidelines evaluation of the roundabouts design parameters and operation as they relate to capacity and safety collecting public opinion and guidelines development The deliverables of the research project include recommended improvements for the existing roundabouts involving geometric striping and signing modifications Also the research project culminates in guidelines for the selection evaluation and design of roundabouts which provide details on the facets of roundabout use as it relates to Arizona **Transactions of the Kansas State Historical Society** ,1908
