Originally published in 1981 this study is concerned with the extent to which the goal of sexual equality in employment as set  
out for example in the Soviet constitutions of 1936 or 1977 had been realised in the USSR at the time The main focus is on  
the nature and extent of economic inequality in the Soviet Union the subject has wider implications not only for our  
understanding of the USSR but also for our perceptions of the way that labour markets operate in a more general setting The  
book should be of interest to feminists and labour economists as well as those with a professional interest in the Soviet Union

Major changes in citizenship and democracy have taken place in Scandinavia within the last two decades Participation in  
conventional forms of politics has declined markedly and the ability of institutions such as political parties and trade unions  
to deliver social mobility is being eroded Instead Scandinavians are turning towards single issue participation and small  
democracy in the workplace or in public sector service institutions The scenario is that of a spectator democracy with  
engaged and conscious spectators who lack the long term political commitment to engage actively in big democracy Also  
Scandinavian citizenship is challenged by structural unemployment EU membership and immigration This book deals with  
the details of these processes and in particular how they have affected political participation identity and social polarization
