

PART 4 SEIGAN

Seigan (correct eye) or chudan (middle stance) is the position of guard par excellence. The meaning of the term is somewhat cryptic: it indicates that in that position the gaze maintains the right *maai* (distance between weapons). All practices, weapon-based and otherwise, have their own specific *maai*. Hankyuan Goro used to exhort his students to pay attention to the different *maai* when using different weapons.

The first thing to learn, therefore, is to recognise the right distance to be "safe". Next, one studies how to break the distance in order to be able to enter or move away.

The key element of the whole *maai* is the level at which to hold the left hand, because it will be the focal point for all the main strokes: they must start from that level and return to it. Basically, the left hand projects in position onto the *seika tanden* (point located in the centre of the body, about three inches below the navel – see page 26).

The tip of the sword is slightly higher than the solar plexus (upperst). As is shown in the images below, the hands maintain their correct distance, and the little finger of the left hand feels the end of the handle.

The body is straight and must not be unbalanced forwards or bent

In Search of the Ninja Antony Cummins, 2012-02-29 Lost in modern myth false history and general misinterpretation the Ninja have been misrepresented for many years More recently a desire for a more historical view of the ninja has become a popular theme in the history martial arts community and Antony Cummins is the primary driving force behind that movement In Search of the Ninja is based upon the Historical Ninjutsu Research Team s translations of the major ninja manuals and consists of genuinely new

material Little historical research has been done on the Ninja of Japan Here for the first time the connection of the famous Hattori family warriors with the Ninja is explained The Samurai versus Ninja myth is dispelled The realities of Ninja skills are analysed How did a Ninja work underwater when mining castle walls How can a bird be used to set fire to the enemy s camp The book explores newly discovered connections to ancient Chinese manuals lost skills and the hidden Zen philosophy that the Ninja followed In Search of the Ninja is the first and only historical look at the shinobi of ancient Japan **Journal of Asian Martial Arts** ,2007 **Medieval Warrior Cultures of Europe and Japan: Body, Mind, Sword** Michael DeMarco,2015-11-17 There are similarities and differences between the European and Japanese medieval warrior traditions that reflect the social evolutions within those cultures Over the years publishing the Journal of Asian Martial Arts we published articles that presented the main themes found in this unique area of comparative studies The most important of these writings are assembled in this anthology for your convenience Chapters 1 and 2 are by Dr Willy Pieter a leading scholar with a thorough grasp of European and Japanese martial art traditions His first chapter examines the feudal system and how aspects of social organization helped form the warrior ethic resulting in a mix of scientific and intuitive elements In the second chapter Dr Pieter illustrates how the perception of the human body and mind are culturally different in the East and West Westerners have a long tradition of dualism which separates the body and mind while the Eastern approach has been wholistic The author discusses scientific and medical histories for insight particularly Chinese and European influences on Japan In the third chapter John Michael Greer presents the esoteric side of a European sword tradition as found in the writings of Dutch fencing master Gerard Thibault ca 1574 1627 He notes that Asian and Western combat systems have been understood in sharply different ways over the last century or so Asian combatives came to be associated with Eastern spiritual traditions and seemed to be very different than any Western combative system However this short chapter shows that there is actually much in common In the final chapter Matthew Galas compares and contrasts the sword arts in Germany with the classical Japanese martial traditions The period covered by this inquiry reaches from approximately 1350 until 1600 The focus is on general principles and combat philosophy The study reveals that German sword techniques were as effective as their counterparts in feudal Japan The content in this anthology is useful for anyone interested in either or both European and Japanese martial art traditions exemplified during their medieval periods Enjoy reading this special anthology dedicated to two leading warrior traditions **Katori Shinto-ryu** Risuke Otake,2009-02-01 *The Secret Traditions of the Shinobi* Antony Cummins,Yoshie Minami,2012-11-27 This illuminating study of martial arts techniques philosophies and lifestyles demystifies one of the most misunderstood figures in Japanese history the ninja A landmark collection of shinobi texts featuring 70 illustrations and 100 poems representing some of the oldest ninjutsu writings in the world The shinobi or ninja is one of the most widely recognized figures in the world of espionage and also one of the most misrepresented What do we really know about the historical shinobi his tactics and his role in medieval Japanese society In *The Secret Traditions of the*
