Architectural Energetics in Archaeology Leah McCurdy, Elliot M. Abrams,2019-01-25 Archaeologists and the public at large have long been fascinated by monumental architecture built by past societies Whether considering the earthworks in the Ohio Valley or the grandest pyramids in Egypt and Mexico people have been curious as to how pre modern societies with limited technology were capable of constructing monuments of such outstanding scale and quality Architectural energetics is a methodology within archaeology that generates estimates of the amount of labor and time allocated to construct these past monuments This methodology allows for detailed analyses of architecture and especially the analysis of the social power underlying such projects Architectural Energetics in Archaeology assembles an international array of scholars who have

analyzed architecture from archaeological and historic societies using architectural energetics It is the first such volume of its kind In addition to applying architectural energetics to a global range of architectural works it outlines in detail the estimates of costs that can be used in future architectural analyses This volume will serve archaeology and classics researchers and lecturers teaching undergraduate and graduate courses related to social power and architecture It also will interest architects examining past construction and engineering projects **Coreldraw X4 In Simple Steps** Kogent
