The Tyranny of the Meritocracy Lani Guinier,2016-01-12 A fresh and bold argument for revamping our standards of merit and a clear blueprint for creating collaborative education models that strengthen our democracy rather than privileging individual elites Standing on the foundations of America s promise of equal opportunity our universities purport to serve as engines of social mobility and practitioners of democracy But as acclaimed scholar and pioneering civil rights advocate Lani Guinier argues the merit systems that dictate the admissions practices of these institutions are functioning to select and privilege elite individuals rather than create learning communities geared to advance democratic societies Having studied and taught at schools such as Harvard University Yale Law School and the University of Pennsylvania Law School Guinier has spent years examining the experiences of ethnic minorities and of women at the nation s top institutions of higher education and here she lays bare the practices that impede the stated missions of these schools Goaded on by a contemporary culture that establishes value through ranking and sorting universities assess applicants using the vocabulary of private highly individualized merit As a result of private merit standards and ever increasing tuitions our colleges and universities increasingly are failing in their mission to provide educational opportunity and to prepare students for productive and engaged citizenship To reclaim higher education as a cornerstone of democracy Guinier argues that institutions of higher

learning must focus on admitting and educating a class of students who will be critical thinkers active citizens and publicly spirited leaders Guinier presents a plan for considering democratic merit a system that measures the success of higher education not by the personal qualities of the students who enter but by the work and service performed by the graduates who leave Guinier goes on to offer vivid examples of communities that have developed effective learning strategies based not on an individual's merit but on the collaborative strength of a group learning and working together supporting members and evolving into powerful collectives Examples are taken from across the country and include a wide range of approaches each innovative and effective Guinier argues for reformation not only of the very premises of admissions practices but of the shape of higher education itself *Comparative Sociology of Examinations* Fumiya Onaka, 2019-03-28 Contemporary societies are constructed constricted and constrained by various series of examinations Governments of both Western and non Western countries tend to conduct detailed multi layered and continuous systems of tests or examinations International tests such as PISA and TIMSS have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries Examinations therefore provide a methodological pivot for comparing a range of societies They enable us to contrast the West and the East the North and the South tribal and mass society ancient and postmodern civilization and so on Comparing parallel societies from across Asia the Middle East Europe and North America this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations It uses ethnographies interviews questionnaires documents statistics and big data analyses to make comparisons on broad scales of time and space In so doing it suggests hypotheses encompassing different kinds of societies in human history including those in the Axial Age and the Modern Ages Great Myths of Education and Learning Jeffrey D.
