Religious Perspectives on Social Responsibility in Health Joseph Tham,Chris Durante,Alberto García

Gómez,2018-04-26 This book discuss the meaning and implications of the social and ethical implications of the notion of social responsibility in healthcare in six major world religions Buddhism Christianity Confucianism Hinduism Islam Judaism This collection of papers is based on a four day workshop where bioethics experts from various religious traditions gathered They discussed the ways in which their respective traditions could or could not uphold the tenets of Article 14 of UNESCO s Universal Declaration of bioethics and Human Rights The different papers presented in this book are based on this interchange of ideas at the workshop The book explores the potential points of convergence among the various perspectives presented as well as a discussion on the ways in which their moral differences may be managed The managing of these moral differences through international socio ethical mechanisms contributes significantly to the UNESCO Universal Declaration of Bioethics and Human Rights goal of simultaneously respecting religio cultural pluralism while upholding a commitment to human rights Fulfilling the Sustainable Development Goals Narinder Kakar,Vesselin Popovski,Nicholas A.

Robinson,2021-08-30 This book contains assessment of the progress or the lack of it in implementing the UN Sustainable Development Goals SDGs Through review of the assessments and of case studies readers can draw lessons from the actions that could work to positively address the goals The 2030 Agenda for Sustainable Development is designed to catalyze action in critical areas of importance to humanity and the planet The effort to implement the SDGs however demands a sense of urgency in the face of environmental degradation climate change emerging conflicts and growing inequality among a number of other socio economic problems Five years after the launch of the 2030 Agenda this book takes stock of how far the world has come and how we can position ourselves to achieve the global targets The book is one of the first to assess how the implementation is impeded by the onset of COVID 19 It contains a special chapter on COVID 19 and the SDGs while many thematic chapters on different SDGs also assess how COVID 19 adversely affects implementation and what measures could be taken to minimize the adverse effects This publication thus provides a fresh look at implementation of the SDGs highlighting impactful and creative actions that go beyond the business as usual development efforts The volume reinforces this analysis with expert recommendations on how to support implementation efforts and achieve the SDGs through international and national strategies and the involvement of both the public and private sectors The result is an indispensable textual tool for policy makers academia intergovernmental organizations IGOs and non governmental organizations NGOs as well as the public as we march toward the 2030 deadline *The Well-being of International Migrants in Rural Areas:*

Schiller, 2019-03-01 Neurolinguistics is a highly interdisciplinary field drawing on linguistics psychology neurology and cognitive neuroscience Neurolinguistics like psycholinguistics covers aspects of language processing but unlike psycholinguistics it draws on data from patients with damage to language processing capacities or the use of modern neuroimaging technologies such as fMRI TMS or both The burgeoning interest in neurolinguistics reflects the fact that an understanding of the neural bases of this data can inform more biologically plausible models of the human capacity for language The Oxford Handbook of Neurolinguistics provides concise overviews of this rapidly growing field and engages a broad audience with an interest in the neurobiology of language
