Implications for Global Agrarian Transformation Ben Cousins, Saturnino M. Borras Jr., Sérgio Sauer, Jingzhong Ye, 2020-05-21 The economic and political rise of the BRICS countries Brazil Russia India China and South Africa and powerful middle income countries MICs such as Argentina Indonesia and Turkey has far reaching implications for global agrarian transformation These countries are key sites of agricultural commodity production distribution circulation and consumption and are contributing to major shifts in the character of agro food systems This comprehensive collection explores these issues through the lens of critical agrarian studies which examine fundamental social change in and in relation to rural worlds The authors explore key themes such as the processes of agrarian change associated with individual countries within the grouping the role and impact of BRICS countries within their respective regions the role of other MICs within these regions and the rising importance of MICs within global and regional agro food systems The book encompasses a wide variety of case studies including the expansion of South African agrarian capital within Africa Brazil as a regional agro food power and its complex relationship with China which has been investing heavily in Brazil the role of BRICS and MICs in Bolivia s soy complex crop booms within China China s role in land deals in Southeast Asia and Vietnamese investment in Cambodia This book will be of interest to students and researchers of critical agrarian studies with a focus on BRICS and MICs It was originally published as a special issue of the journal Globalizations *Climate Change Adaptation and Development* Tor Håkon Inderberg, Siri Eriksen, Karen O'Brien, Linda Sygna, 2014-11-20 Climate change poses multiple challenges to development It affects lives and livelihoods infrastructure and institutions as well as beliefs cultures and identities There is a growing recognition that the social dimensions of vulnerability and adaptation now need to move to the forefront of development policies and practices This book presents case studies showing that climate change is as much a problem of development as for development with many of the risks closely linked to past present and future development pathways Development policies and practices can play a key role in addressing climate change but it is critical to question to

what extent such actions and interventions reproduce rather than address the social and political structures and development pathways driving vulnerability The chapters emphasise that adaptation is about much more than a set of projects or interventions to reduce specific impacts of climate change it is about living with change while also transforming the processes that contribute to vulnerability in the first place This book will help students in the field of climate change and development to make sense of adaptation as a social process and it will provide practitioners policymakers and researchers working at the interface between climate change and development with useful insights for approaching adaptation as part of a larger transformation to sustainability *Transformations of Rural Spaces in Mozambique* Cecilia Navarra,Cristina Udelsmann Rodrigues,2021-11-18 With contributions from both Mozambican and non Mozambican scholars of multi disciplinary backgrounds and approaches this book provides a range of new perspectives on how Mozambique has been characterized by profound changes in its rural communities and places Despite the persistence of poverty in Mozambique significant investments have been made in rural areas in extractive industry or agribusiness resulting in both the transformation of these areas and a new set of tensions and conflicts related to land tenure and population resettlement Meanwhile the Mozambican rural landscape is one dominated by smallholders whose livelihoods depend on both farming and non farming activities and who are often extremely vulnerable to shocks and pressure over resources The emergence of new civil society organizations has led to clashes with in the interests of local political administrative and economic powers creating fresh social conflicts Transformations of the Rural Spaces in Mozambique examines the process of transformation across a range of settings from the impacts of large scale industries and the transformation of agriculture to relations between state and non state actors and issues related to land **Natural Science Examination Papers ,1890**
