Use this completion exercise to check your understanding of the concepts and terms that are introduced in this section. Each blank can be completed with a term, short phrase, or number.

Solids tend to be dense and ____1____. They do not flow or take the shape of their containers, like liquids do, because the particles in solids vibrate around ____2____ points. When a solid is sufficiently heated and its particles vibrate so strongly that they are no longer held in fixed positions, the solid ____3____. The ____4____ is the temperature at which a solid turns to liquid. The melting and ____5____ of a substance are at the same temperature. In general, ionic solids tend to have relatively ____6____ melting points while molecular solids tend to have relatively low melting points. Most solids are ____7____ in nature. The particles are arranged in a pattern known as a crystal ____8____. The smallest subunit of a crystal lattice is the ____9____. Some solids have a disordered array of particles and are ____10____.
