## Solving Equations with one variable

### Who, where and when?

**Who?**  
One of the following six Superheroes has committed a murder. The suspects were given a maths problem to solve. Only the one telling the truth

Captain America says that for the equation  $2x+3=11$ ,  $x$  must equal 3

Nick Fury says that for the equation  $7y-15$ , that  $y$  must equal 6

Howard says equation

Loki says that for the equation

$$\frac{x}{2} + 7 = 12$$

$x$  must equal 2.5

$x$  must equal 16

**The**

The murder was committed at one of the locations below, but which ones? It happened where TWO of the calculations are correct.

**The Bowling Alley**

If  $x/4 - 3 = 17$ , then  $x$  must equal 80  
If  $6y + 15 = 40$ , then  $y$  must equal 64  
If  $5z + 3 = 30$ , then  $z$  must equal 30

**The Cinema**

If  $x/7 = 3$ , then  $x$  must equal 21  
If  $9x + 2 = 82$ , then  $x$  must equal 9  
If  $10x - 10 = 40$ , then  $x$  must equal 5

**The Gym**

If  $x/6 + 2 = 2$ , then  $x$  must equal 12  
If  $x/8 + 2 = 4$ , then  $x$  must equal 42  
If  $7x - 11 = 24$ , then  $x$  must equal 4

**The Coffee Shop**

If  $6x + 8 = 26$ , then  $x$  must equal 3.5  
If  $9x + 5 = 32$ , then  $x$  must equal 3.5  
If  $x/5 + 4 = 5$ , then  $x$  must equal 12.5

**When?**

Find the day where BOTH statements are correct:

**Monday**

- If  $8 = 2x - 4$ , then  $x = 6$
- If  $5x - 20 = 10$ ,  $x$  is the following equation

**Tuesday**

- $5x - 4 = 24$ , then  $x = 4$
- $10x - 8 = 72$ , then  $x = 8$

**Wednesday**

- If  $6x + 21 = 48$ ,  $x$  is the following equation
- If  $11x + 6 = 100$ , then  $x = 9$

**Thursday**

- If  $x/3 - 3 = 4$ , then  $x = 21$
- If  $x/6 + 4 = 5$ , then  $x$  must equal 10

**Friday**

- If  $4x + 4 = 40$ ,  $x$  is the following equation
- If  $x/2 = 10$ , then  $x = 20$

## **Math Murder Mystery 1:**

**Junior Mini Mathematical Murder Mysteries** Jill Whieldon, 2019-01-21 16 blackline masters to stretch and engage ages 8-11. Here's a chance for students to turn detective and apply their mathematical knowledge to solve some murder mysteries. Each of the 16 activities is intended to be a consolidation exercise covering topics such as arithmetic, algebra, shapes and simple graphs and charts. For teachers: Apart from the obvious use as homework activities, the activities can play a great role in generating mathematical discussion too. Students often work well in pairs on this sort of activity as they are able to discuss their methods and combine forces when coordinating several features of a problem. Some of the tasks require a reasonable level of logical thinking and students need to understand mathematical terms such as product, factor, prime etc. The benefits to the students will be greatly improved if their knowledge of such mathematical language has been reinforced before attempting these murder mysteries. Success through this type of activity can increase student's confidence and make them eager to progress. Some of the tasks included here reflect wider topics met in the primary school curriculum and there is an element of general knowledge evident. Further investigative work could be generated from these, for example in 'Water' can you find a river whose length would fit between the Severn and the Thames? In 'Romans' can you find an emperor who reigned for less than 10 years? For parents: These murder mysteries use mathematical skills learnt at school but will both reinforce knowledge and stretch students who crave a challenge. It is important to check that students have covered and understand the topic before using them. The exercises are intended to be entertaining as children love using their mathematical skills to find out whodunnit. Contents: Mixed Arithmetic 1, Mixed Arithmetic 2, Number and Algebra 1, Number and Algebra 2, Number and Angle Mix, Money, Coordinates, Shape, Charts, Family, Sports, Music, Europe, The Romans, Water, Missing Pieces. **Math Horizons**, 1993. **MAT 12 Years Topic-wise Previous Year Solved Papers (2011 - 2022)**

**X Marks the Spot** Richard Garfinkle,David Garfinkle,2021-02-04 X Marks the Spot is written from the point of view of the users of mathematics Since the beginning mathematical concepts and techniques such as arithmetic and geometry were created as tools with a particular purpose like counting sheep and measuring land areas Understanding those purposes leads to a greater understanding of why mathematics developed as it did Later mathematical concepts came from a process of abstracting and generalizing earlier

mathematics This process of abstraction is very powerful but often comes at the price of intuition and understanding This book strives to give a guided tour of the development of various branches of mathematics and what they re used for that will give the reader this intuitive understanding Features Treats mathematical techniques as tools and areas of mathematics as the result of abstracting and generalizing earlier mathematical tools Written in a relaxed conversational and occasionally humorous style making it easy to follow even when discussing esoterica Unravels how mathematicians think demystifying math and connecting it to the ways non mathematicians think and connecting math to people s lives Discusses how math education can be improved in order to prevent future generations from being turned off by math The Mathematical Intelligencer ,1990 The Publishers Weekly ,1911 *More Mini Mathematical Murder Mysteries* Jill Whieldon,2019-01-21

We all like to think we can solve a murder given the right clues Here s another chance to use mathematics skills to identify whodunnit following the great success of the first book in the series Mini Mathematical Murder Mysteries The students are given the data or a diagram to solve a problem which is always which of various characters is a murderer To find out the student must solve all or most of the questions on the sheet to identify wrong answers as well as correct ones Problems are staged so there is an element of suspense for the individual and racing between students to solve the mystery The topics covered in this book are appropriate for ages 12 14 years The tasks have been used successfully with older pupils too as a reminder of topics covered previously They would also be suitable for younger pupils who have met the appropriate language and content They are likely to take about 40 minutes but this will depend on the ability of the class to coordinate the different aspects of each task The book is aimed at both teachers and parents Teachers This is a set of consolidation resources rather than a teaching tool They have worked well with a variety of classes often putting the students in pairs to enable them to talk about the methods they re using while they solve the murder The author has found that their cooperative skills have improved as has their ability to plan and delegate in a bid to win Parents Much more fun than having endless mathematics exercises to trawl through Children will engage with the mathematics here presented in an entertaining way Ideal for use in revision or other consolidation exercises They are also great fun for after school clubs such as mathematics clubs seeking to run short activities Reading in the Content Areas: Mathematics McGraw Hill,2004-01-16 Based on the best selling Six Way Paragraphs books these individual titles help students master the essential skills needed to organize understand and apply information in math science and social studies Help improve students content area reading Focus on one content area at a time Coordinate your reading program with content classrooms *The State Trooper* ,1927 *Microtimes* ,1993-04
