This ground-breaking collection presents theoretical, educational and psychophysiological perspectives on the widespread phenomenon of mathematics anxiety. Featuring contributions from leading international researchers, *Mathematics Anxiety* challenges preconceptions and clarifies several crucial areas of research such as the distinction between mathematics anxiety from other forms of anxiety, i.e. general or test anxiety, the ways in which mathematics anxiety has been assessed, e.g. throughout self-report questionnaires or psychophysiological measures, the need to clarify the direction of the relationship between math anxiety and mathematics achievement, which causes which.
