This book was not created to wow the reader with its prowess but more created to warehouse decades of material. If you have a copy then you do indeed have a rare bird. Like the old Saab s Robert loves to own and drive this book is also limited. Severe mental illness has distorted some visions and limited some expressions but never let you be controlled by such conditions rather take control of them and thrive. The cover for this volume of imperfections is by the incomparable Conny Valentina and inside the image is another story. Rejoice in discovery and forgive in measure.

User Manual for Your Mind Samuel Arcelay, 2021-11-04 User Manual for Your Mind Volume 1 by Samuel Arcelay Is an introduction to The Human Operating System. It is my personal summary of studies on the subconscious mind the conscious mind and the brain. I combine my studies in psychology neuroscience neuroplasticity neurolinguistics programming a quantum jump and the brain. My goal was to take this scientific jargon and write a user friendly instruction manual on the human operating system. A down to earth user manual on behavioral science and how we operate. The intended experience for the reader is that he or she benefit from this knowledge of behavioral science without having to deal with technical jargon and information that has no practical application to daily life. My research is based on lectures books videos from respected university professors lecturers psychologists neuroscientists and hypnotherapists. I summarized personal experience and case studies of other people and blended them with practical life scenarios that demonstrate how the brain the conscious mind and the subconscious mind work. They each communicate in a specific language and they each have rules and laws. They each have a specific value system. Science tells us that the brain weighs 3 pounds it has enough electricity to power a light bulb for a day. It has trillions of neurons and connections etc. How does that information help us in our daily life.

What good does that information do for the person who just woke up and says I hate my job Or I hate my coworker or I wish I could stop smoking or drinking save money enhance my self esteem etc The brain is not the mind the mind is what the brain produces The brain the conscious mind and the subconscious mind they each understand a different language they each have a specific currency and value system The conscious mind derives its value system from words logic past present and future experience anticipation it sees it hears The subconscious mind derives its value system from the present emotions images beliefs childhood impressions It does not see it does not hear it does not recognize past or future it lives and remains in the present This knowledge is vital in communicating with the human operating system I thoroughly discuss childhood impressions and their impact on our lives as adults This book can literally change your life The brain its job is not personal development or goal achievement its job is survival to keep you alive And please note the brain is not the mind mind is what the brain produces Combining all of these creates an algorithm a code a program for your brain and your mind You can speak to each mind and your brain in the language each understands You are the programmer you write the code You create the blueprint Think of your brain as a computer and the subconscious and the conscious mind as two separate hard drives Each hard drive has its own software program or apps Think of the people places and things in your life as the icons on your computer desktop or mobile phone iPad or tablet You click and you open an app and run a program You click X and you close the app or program Your brain and minds operate the same way Your brain is the pharmacy your mind writes the prescription Samuel Arcelay **Mind in Harmony** Subhuti,2015-03-06 It s not our bank balance looks social status or popularity that determines how happy free and fulfilled we are in life Finally what really counts is our state of mind Subhuti helps us to identify what s going on in our mind and see clearly what s helpful and what will end in tears Vessantara This is a refreshing approach to the classical Abhidharma material relentlessly experiential and eminently practical Andrew Olendzki
