

# Question 4 Model

- Both texts 2 and 3 use strong, vivid language but for different effects. In text 3, strong language is used throughout the piece. For example, when the pair are approaching the valley, it states that 'Panic entered the hearts of both of them'. This strong language helps the reader imagine their emotions more strongly. It shows that they were absolutely terrified, emphasised by the strong noun 'panic', and this means that the reader is more likely to empathise with the characters and be gripped by the story.
- Text 2 also uses strong language, in the final paragraph. An example is where it mentions the families' fear that a 'media onslaught' will 'overwhelm' the men when they 'escape from their underground dungeon'. As with text 3, this shows fear, but this time from the families of those involved, rather than the individuals themselves. Using the metaphor 'underground dungeon' to describe their location is striking. It carries associations of punishment and suffering, even though the miners have done nothing wrong. As a result, the readers empathise strongly with the miners and their families, and feeling glad that they are likely to escape.

**Metaphor Translation in Popular Science** Sui He,2024-12-30 This book explores the intersection of metaphor studies and translation studies specifically focusing on popular scientific articles The volume complements existing

work on conceptual metaphor theory in translation by aligning it with conceptual blending theory to demonstrate how an integrated approach offers a more expansive understanding of the cognitive and linguistic dimensions of metaphor translation. It includes an essential introduction to the key concepts and theories in metaphor studies and metaphor translation research, discerning the importance of localising theories from neighbouring disciplines such as metaphor studies for advancing interdisciplinary research in translation studies. Sui He applies this approach to popular cosmological discourse, analysing examples from articles in *Scientific American* and their Chinese translations, allowing for a nuanced examination of translation strategies adopted by translators at both cognitive and linguistic levels, which presents the circulation and transformation of popular cosmological knowledge from English in two Chinese mediated communities. This book will be of interest to students and scholars in translation studies, metaphor studies and discourse analysis.
