Hoeting, Richard Lyttleton Smith, 2019-01-15 This handbook focuses on the enormous literature applying statistical methodology and modelling to environmental and ecological processes The 21st century statistics community has become increasingly interdisciplinary bringing a large collection of modern tools to all areas of application in environmental processes In addition the environmental community has substantially increased its scope of data collection including observational data satellite derived data and computer model output The resultant impact in this latter community has been substantial no longer are simple regression and analysis of variance methods adequate The contribution of this handbook is to assemble a state of the art view of this interface Features An internationally regarded editorial team A distinguished collection of contributors A thoroughly contemporary treatment of a substantial interdisciplinary interface Written to engage both statisticians as well as quantitative environmental researchers 34 chapters covering methodology ecological processes environmental exposure and statistical methods in climate science Forest Science ,2015 The New Statistics with R Andy Hector, 2015 Statistical methods are a key tool for all scientists working with data but learning

the basic mathematical skills can be one of the most challenging components of a biologist s training This accessible book provides a contemporary introduction to the classical techniques and modern extensions of linear model analysis one of the most useful approaches in the analysis of scientific data in the life and environmental sciences It emphasizes an estimation based approach that accounts for recent criticisms of the over use of probability values and introduces alternative approaches using information criteria Statistics are introduced through worked analyses performed in R the free open source programming language for statistics and graphics which is rapidly becoming the standard software in many areas of science and technology These analyses use real data sets from ecology evolutionary biology and environmental science and the data sets and R scripts are available as support material The book s structure and user friendly style stem from the author s 20 years of experience teaching statistics to life and environmental scientists at both the undergraduate and graduate levels The New Statistics with R is suitable for senior undergraduate and graduate students professional researchers and practitioners in the fields of ecology evolution environmental studies and computational biology Canadian Journal of Fisheries and Aquatic Sciences ,2014-05 Fire and Climate Change in California Meg Krawchuk, Max Moritz, 2012 Ethology and Behavioral Ecology of Phocids Daniel P. Costa, Elizabeth A. McHuron, 2022-03-17 Research .2015 Phocid or earless or true seals are ecologically diverse occupying habitats from the tropics to the poles in marine and freshwater and feeding on anything from tiny zooplankton to other marine mammals. There are 18 species of phocid seals the smallest species ringed seal is more than 20 times smaller than the largest southern elephant seal with marked sexual dimorphism present in some species This book examines the behavior ecology and physiology that allow phocid seals to inhabit such a wide range of habitats The book is composed of 16 chapters written by 37 authors from 8 countries The book first describes the general patterns of phocid behavior followed by descriptions of what is known about well studied species We have taken a holistic approach focusing not only on the behaviors themselves but also on the factors that constrain the expression of behavior and the proximate mechanisms driving behavior In many cases the chapters represent collaborations between well established researchers and early mid career individuals who bring new perspectives to help carry the field of phocid behavioral ecology well into the future Wildlife Research Report ,2012 **Ecological and Human** Dimensions of Tribal and State Natural Resource Management Nicholas J.
