Automatic Cruise Stopper

SERVICE MANUAL MS-10C-IIA

KATO WORKS CO., LTD.

PREFACE

This Manual has been compiled as a handbook for servicing "Compuload", the new automatic digital overload protection device which is fitted to KATO cranes.

Unlike the conventional analog ACS device, the new digital ACS system with its built-in microprocessor has a self-diagnostic function for servicing in addition to its function as an overload protection device. Consequently, while the conventional analog ACS device requires a service log for data collection, this can now be performed by the digital ACS system with its self-diagnostic function. Furthermore, it has become possible to automatically monitor the status of the overload protection device itself during routine crane operations, resulting in improved reliability. However, even the most advanced electronics cannot provide adequate crane control performance unless the procedure is correctly followed by service engineers.

It is therefore recommended that this Manual be read thoroughly so that the appropriate service techniques can be mastered.
